PART 2

**TABLES AND CHARTS
BY COUNTRY**

PART 2:

TABLES AND CHARTS BY COUNTRY

The tables and charts on **Pages 1 to 58** present nominal and real effective exchange rates of the currencies of the European Union Member States, the candidate countries Bulgaria and Romania, as well as Japan and the United States. Aggregate measures for the European Union as a whole (EU25) and the group of countries participating in the euro area (EUR12) are presented as well. Each country (or country group) is compared with (the rest of) 34 industrial countries (the 25 EU countries, Norway, Australia, Canada, Japan, the United States, Mexico, New Zealand, Turkey and Switzerland), with the European Union and with the euro area.

The tables on **Pages 59 to 70** present cross-national table of nominal and real effective exchange rates of the currencies of the EU, the USA and Japan as well as aggregate measures for the EU and the euro area. Each cross-national table of real effective exchange rates is based on a single price or cost deflator. These tables aim to facilitate a comparison of developments in the countries. The final tables show the latest double export weight matrices that were used to calculate effective exchange rates.¹

¹ The technical annex provides further details.
