## Foreword

In May 2011 the High Representative of the Union for Foreign Affairs and Security Policy and the European Commission put forward a new policy response to a changing EU neighbourhood<sup>1</sup>.

The renewed neighbourhood policy put additional emphasis on shared commitment to the universal values of human rights, democracy and the rule of law and involving a much higher level of differentiation. It also introduces the concept of “**deep and sustainable democracy**” encompassing the following elements: free and fair elections; freedom of association, expression and assembly and a free press and media; the rule of law administered by an independent judiciary and right to a fair trial; fighting against corruption; security and law enforcement sector reform (including the police) and the establishment of democratic control over armed and security forces.

This year Country Progress Reports reflect the new approach and pay additional attention to progress towards deep and sustainable democracy and the respect of human rights in general. They are accompanied, for the first time by a Statistical Annex which builds and expand on the basic statistical information provided until 2011 in the Annex to the Sector Report and complements the narrative information included in the Country Progress reports.

Besides the “classical” economic, trade and social data, this Annex also collates information and indicators related to advancements in deep and sustainable democracy and in the respect of human rights. Such information and indicators come from a variety of sources, notably: the Freedom House, Transparency International, the Economist Intelligence Unit, the World Bank, Ilga International. A close cooperation with civil societies and NGOs has brought to include indicators on freedom of the press, on the respect of LGBTI rights, on the fights against cruel and inhuman treatments and against death penalty.

The Statistical Annex also provides more detailed fact and figures on the EU assistance in a new set of Country fiches.

The present document provides, as a background to the European Neighbourhood Policy (ENP) Joint Communication, selected political, economic, mobility and assistance related indicators, statistics and graphs.

## 2. Deep Democracy Indicators

### **Transparency International Corruption Perception Index (2012)**

The Corruption Perceptions Index ranks countries/territories based on how corrupt their public sector is perceived to be. A country/territory's score indicates the perceived level of public sector corruption on a scale of 0 – 10 for 2011 and 0 – 100 for 2012, where 0 means that a country is perceived as highly corrupt and 10 for 2011 and 100 for 2012 means that a country is perceived as very clean. A country's rank indicates its position relative to the other countries/territories included in the index.

## World Bank's "Doing Business 2013" Ranking (2012)

Economies are ranked on their ease of doing business, from 1 – 185. A high ranking on the ease of doing business index means the regulatory environment is more conducive to the starting and operation of a local firm. This index averages the country's percentile rankings on 10 topics, made up of a variety of indicators, giving equal weight to each topic. The rankings for all economies are benchmarked to June 2012

## Ratification of core labour standards (2012)

The core labour standards are fundamental principles that protect basic human rights in the workforce. As stated in the ILO Declaration on Fundamental Principles and Rights at Work (1998) the core labour standards aim to: (1) eliminate all forms of forced or compulsory labour; (2) effectively abolish child labour; (3) eliminate discrimination in respect of employment and occupation; and (4) ensure the freedom of association and the right to collective bargaining.

#### 4. European Integration Index for Eastern Partnership Countries – Open Societies Foundations / Renaissance foundation

The Index measures the situation in EaP countries in May 2012. European integration is assessed through three dimensions:

- 1. Linkage:** growing political, economic and social ties between each of the six EaP countries and the EU;
- 2. Approximation:** structures and institutions in EaP countries converging towards EU standards and in line with EU requirements;
- 3. Management:** evolving management structures for European integration in EaP countries.

Benchmarks were defined by assigning 1 and 0 to the best and worst possible performance.

	<b>Armenia</b>	<b>Azerbaijan</b>	<b>Belarus</b>	<b>Georgia</b>	<b>Moldova</b>	<b>Ukraine</b>
Linkage	0,41	0,36	0,31	0,51	0,69	0,64

## 8. TAIEX events, SIGMA operations and twinning projects with ENP partners **Breakdown of TAIEX requests from ENP partners and the Russian Federation**

### **Technical Assistance and Information Exchange (TAIEX)**

TAIEX was introduced to the ENPI region in 2006 to offer short-term assistance and advice to Partners as they implement their ENP Action Plans. It was initially set up in 1996 to provide short-term, targeted technical assistance to the candidate countries. It supports Neighbouring partners in the approximation, application and enforcement of EU legislation. It is mainly demand driven, channels requests for assistance, and contributes to the delivery of appropriate tailor-made expertise to address problems at short notice. Assistance is given through expert missions, workshops or seminars and study visits.

## SIGMA

### Support for Improvement in Governance and Management (SIGMA)

SIGMA, a joint initiative of OECD (Organisation for Economic Cooperation and Development) and the EU, was founded in 1992. Principally financed by the EU, it focuses on strengthening public management in areas such as administrative reform, public procurement, public sector ethics, anti-corruption, and external and internal financial control. On a demand-driven basis, it has been assisting countries in installing governance and administrative systems appropriate to a market economy, functioning under the rule of law in a democratic context.

## Twinning projects

### Twinning

Twinning is a joint implementation tool of cooperation between Public Administrations of a EU Member State and of a Beneficiary Country. Twinning is used to support the efforts of neighbour countries to harmonise their regulations with EU legislation. Twinning aims at modernising the institution of the Beneficiary Country through training, reorganisation as well as drafting of laws and regulations modelled after the EU *acquis*. It should be related to the domains of co-operation foreseen by the Action Plan of the European Neighbourhood Policy. It consists of sending to the Beneficiary Country at least one resident adviser and a number of medium and short-term missions, all to be carried out by public officials of the EU Member State institution.
