1. INTRODUCTION

Effective implementation of structural reforms, timely and adequate transposition and implementation of the Union acquis, as well as efficient and effective use of the European Union funds are vital for encouraging investment, unlocking the growth potential, raising living standards and supporting the process of resilience and convergence in the EU. Without growth-enhancing reforms, economies stagnate and decline.

At the same time, overall successful implementation of reforms requires efficient and effective public administration, since this affects the performance of all public policy domains. For this reason, adequate administrative capacity (notably in terms of competences, mobility, incentives and changes to work processes) is crucial for well-functioning economies and to underpin the success of structural reforms.

The Structural Reform Support Programme (SRSP), established in May 2017, covers the 2017- 2020 period¹. Its objective is to strengthen the Member States' capacity to prepare and implement growth-enhancing reforms, including by providing assistance for the efficient and effective use of Union funds. The final decisions on the design, structure and implementation of reforms lie with the Member States, however. Support from the SRSP is available to all EU Member States upon request², requires no co-financing and involves a relatively small administrative burden for Member States. It is managed by the Commission's DG REFORM (previous Structural Reform Support Service).

The Commission monitors how support measures financed by the programme are implemented and provides the European Parliament and the Council with an annual monitoring report³ for each year of implementation.

This report provides an overview of the implementation of measures selected for funding under the 2019 SRSP round. In addition, section 5 of the report (progress in relation to the programme's objectives) describes the progress of some measures selected for financing under the 2017 and 2018 SRSP rounds and covered by the previous annual monitoring reports.

¹ Under Regulation (EU) 2017/825 of the European Parliament and of the Council, OJ L 129, 19.5.2017, p. 1–16, as amended by Regulation (EU) 2018/1671, OJ L 284, 12.11.2018, p. 3–5 (the SRSP Regulation). ² Article 7 of the SRSP Regulation.

³ Article 16 of the SRSP Regulation.

Article 16 of the SRSP Regulation Monitoring and evaluation

[...]

2. The Commission shall provide the European Parliament and the Council with an annual monitoring report on the implementation of the Programme. That report shall include information on:

- a) requests for support submitted by Member States, referred to in Article 7(1);
- b) analyses of the application of the criteria, referred to in Article 7(2), used to analyse the requests for support submitted by Member States;
- c) cooperation and support plans, referred to in Article 7(2);
- d) participation of reform partners, referred to in Article 9;
- e) special measures adopted, referred to in Article 13(6); and
- f) implementation of support measures⁴.

2. BACKGROUND INFORMATION

2.1. Budget of the programme

The budget for the implementation of the Programme over the 2017-2020 period is **€222.8** million (following the amendment to the original SRSP Regulation)⁵. The budget available for 2019 was **€79.3** million⁶.

In addition to the SRSP budget, Article 11 of the SRSP Regulation and Article 25 and 59 of Regulation (EU) No 1303/2013 (the Common Provisions Regulation) also enable the programme to be financed through additional voluntary contributions from Member States, using resources provided for technical assistance at the initiative of the Member States under the European Structural and Investment Funds (ESI Funds). In 2019, no Member States made voluntary transfers to the SRSP. The overall budget for 2019 thus remained \notin 79.3 million.

2.2. Objectives and scope of the programme

The **general objective** of the SRSP is to contribute to institutional, administrative and growth-sustaining structural reforms in the Member States⁷. This is achieved by providing support to national authorities with the aim of reforming and strengthening institutions, governance, public administration, and economic and social sectors in response to economic and social challenges.

The overarching goal is to enhance cohesion, competitiveness, productivity, sustainable growth, job creation, and investment and social inclusion and to contributing to real convergence in the Union, which may also prepare for participation in the euro area, in particular in the context of economic governance processes, including through assistance for the efficient, effective and transparent use of the Union funds.

The specific objectives of the programme⁸ are to:

⁴ Point (f) of Article 16 was added by Regulation (EU) 2018/1671, amending Regulation (EU) 2017/825 (see below).

⁵ Regulation (EU) 2017/825, as amended by Regulation (EU) 2018/1671.

⁶ Excluding support expenditure.

⁷ Article 4 of the SRSP Regulation

⁸ Article 5 of the SRSP Regulation.

- a) support the intiatitives of Member States' national authorities to design their reforms according to their priorities;
- enhance the national authorities' capacity to formulate, develop and implement reform policies and strategies and pursue an integrated approach;
- c) support the efforts of national authorities to define and implement appropriate processes and methodologies; and
- d) assist the national authorities in enhancing the efficiency and effectiveness of human resources management.

In addition, with a view to pursuing the general and specific objectives, the Programme could finance actions and activities also in support of reforms that may help Members States in their preparation to join the euro area.

The support therefore covers all stages of reform, from inception to implementation and evaluation of results.

Support can be provided for reforms which fall under the following main broad policy areas9:

- a) revenue administration and public financial management;
- b) governance and public administration;
- c) growth and business environment (including energy and climate action);
- d) labour market, education, health and social issues; and
- e) financial sector and access to finance.

2.3. European added value

The Commission should ensure that actions and activities selected for funding are likely to produce results that show a clear European added value¹⁰.

European added value is ensured in particular by:

- a) the development and implementation of solutions that address local, regional or national challenges that have an impact on cross-border or Union-wide challenges, and which may also contribute to social, economic and territorial cohesion;
- b) their complementarity and synergy with other Union programmes and policies at regional, national, Union and international level, as appropriate;
- c) their contribution to the consistent and coherent implementation of Union law and policies, as well as the promotion of European values, including solidarity;
- d) their contribution to the sharing of good practices, also with a view to increasing the visibility of the reform programmes, and to building a Union-wide platform and network of expertise; and
- e) the promotion of mutual trust between beneficiary Member States and the Commission and of cooperation among Member States.

2.4. Implementation of the programme and forms of support

The support provided under the SRSP is tailored to the country's needs. Experts accompany national authorities throughout different stages of the reform process (scoping, prioritising, designing, road mapping, implementing, evaluating). The support depends on the nature of the reform, the urgency of action, the resources available and the obligations deriving from the EU Financial Regulation.

 ⁹ For the full list, please refer to Article 5(2) of the SRSP Regulation.
 ¹⁰ Article 3 of the SRSP Regulation.

In concrete terms, the technical support can take the form of¹¹:

- **long-term or short-term presence of experts,** and cooperation on the ground with the national authorities throughout the reform process or at certain stages;
- actions to help address specific needs diagnostic analyses, recommendations on how to address the situation, a strategy, draft of a new law/act or modification of an existing one; proposals for (new) working and organisational procedures; and/or
- wider actions that increase administrative capacity seminars, training, working visits, development of methodologies, collection of data, establishment of benchmarks, etc.

2.5. Data collection

All data on the implementation of the SRSP is stored by the European Commission in an internal IT tool managed by DG REFORM. The tool facilitates monitoring and reporting on the implementation of SRSP projects. It has provided data for this report.

¹¹ Article 6 of the SRSP Regulation.

3. IMPLEMENTATION OF SUPPORT MEASURES FUNDED BY SRSP 2019 BUDGET

Introduction 3.1.

2019 was the third year of activities under the SRSP¹². As indicated previously, the budget for support measures in 2019 amounted to €79.3 million, available to all EU Member States. On 27 February 2019, the Commission adopted the annual work programme for the SRSP 2019¹³, setting out priorities for the year, objectives, expected results and outlined actions to be implemented. The annual work programme for 2019 was sent to the European Parliament and the Council on 30 April 2019¹⁴. The focus of this report is the support measures selected for funding in 2019, and it also covers the implementation of support measures selected in 2017 and 201815.

3.2. Requests for support submitted by the Member States

Member States were invited to submit their requests for support by 31 October 2018¹⁶, and to provide information on the following elements:

- a) problem/need to be addressed by the requested support measures;
- b) the breadth of the problems identified (impact on other areas in the economy);
- c) and depth of the problems identified (severity);
- d) the urgency of the request for support;
- e) relevant socio-economic indicators to be taken into consideration when analysing the request, the indicative duration and estimated cost;
- f) expected results/use of the results of the support measures requested;
- g) information on the administrative capacity of the Member State to implement the results of the support measures and potential providers.

In their requests for support, Member States also identified the relevant circumstances¹⁷ under which they were submitting the requests:

- a) the implementation of reforms undertaken by Member States at their own initiative, in particular to achieve sustainable economic growth and job creation;
- b) the implementation of economic adjustment programmes (for Member States that receive Union financial assistance); and
- c) the implementation of growth-sustaining reforms in the context of economic governance processes, in particular of European Semester country-specific recommendations, or of actions related to the implementation of Union law.

The requests for support from interested Member States were submitted centrally by designated coordinating authorities¹⁸, i.e. authorities responsible for submitting requests on behalf of a Member State.

¹² Regulation (EU) 2017/825 of the European Parliament and the Council of 17 May 2017 on the establishment of the Structural Reform Support Programme for the period 2017 to 2020 entered into force on 20 May 2017. ¹³ Commission Implementing Decision on the financing of Structural Reform Support Programme and the adoption of the

work programme for 2019, 2019, C(2019) 1542 final.

¹⁴ Article 13(5) of the SRSP Regulation.

¹⁵ The implementation period covered by this report (of the support measures selected for funding in 2017, 2018 and 2019) is 31 August 2017 - 31 January 2021.

¹⁶ Article 7(1) of the SRSP Regulation. ¹⁷ Article 7(3) of the SRSP Regulation.

¹⁸ The role of the coordinating authorities is defined in section 18.2 of the cooperation and support plans signed with all Member States benefiting from the programme.

Each coordinating authority was invited to prioritise requests for its Member State, but not all of them did so in 2019. The requests for support could come from the national authorities of the Member States, i.e. authorities at central, regional or local level, or independent authorities.

Once the requests for support were selected, the Commission then concluded a cooperation and support plan with the coordinating authority of each beneficiary Member State (see section 3.5).

Coordinating authorities

To ensure proper coordination and efficient communication with the Commission, Member States designate a coordinating authority to act as the interlocutor of the DG REFORM for the overall implementation of the country's cooperation and support plan. The coordinating authorities are responsible at national level for coordinating and prioritising the requests for support submitted by the Member State, and for coordinating the effective implementation of the measures envisaged and the achievement of the objectives set out in their cooperation and support plan. The coordinating authority is also encouraged to initiate corrective actions if needed.

For the 2019 selection round, **580 requests for support were submitted by 27 EU Member States** (including 1 request submitted by the UK, which was an EU Member State at that time) for an **estimated amount¹⁹ that was almost 2.5 times the available 2019 SRSP budget** (€194 million; as compared to the available budget for the SRSP 2019 of €79.3 million). The chart below shows the number of requests submitted per Member State, and a comparison with the previous round.

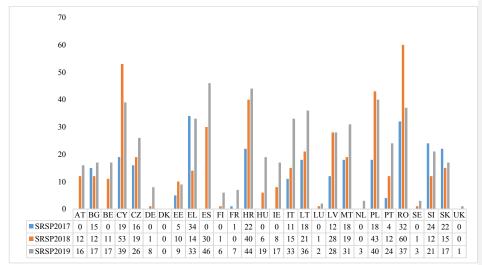

Figure 1: Number of requests submitted for funding under the SRSP 2017 - 2019 rounds, per Member State

¹⁹ As estimated by the Member States.

More Member States participated in the Programme in 2019 than under the 2018 SRSP, and the total number of submitted requests was higher. The distribution of requests across the main broad policy areas was as follows:

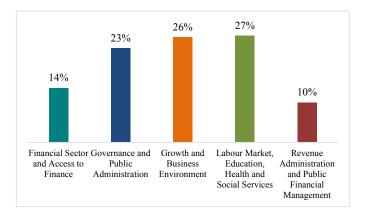

Figure 2: Number of requests submitted by Member States under SRSP 2019 – split per main broad policy area (in percentages

By comparison, the highest number of requests submitted under SRSP 2018 were in the area of growth and business environment (32%) and governance and public administration (26%). For SRSP 2019, there was a significant increase in the area of labour market, education, health and social services (27%), closely followed by growth and business environment (26%).

More than one third of the requests submitted by the Member States for the SRSP 2019 round related to the EU economic governance process. 27% of the requests concerned the implementation of Union priorites, and also 27% concerned the implementation of Member States' own priorities. The remaining requests were related to the implementation of Union law (e.g. infringements) with 6%, and the implementation of economic adjustment programmes.

The chart below shows the distribution by category.

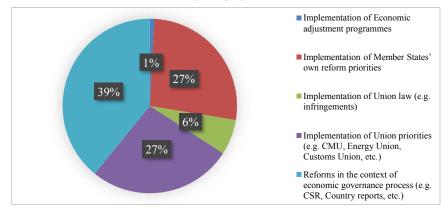

Figure 3: Number of requests submitted by Member States - split according to circumstances

Under the SRSP 2017 and 2018 rounds, the majority of the requests also concerned challenges related to the EU economic governance process (38% and 30% respectively), but under SRSP 2019 the share of these types of requests increased even further (39%)

3.3. Application of the assessment criteria

The Commission's assessment of submitted requests was based on two sets of elements²⁰:

- general principles: transparency, equal treatment and sound financial management; and
- criteria for the analysis of requests: urgency, breadth and depth of the problems, support needs in the policy areas concerned, analysis of socio-economic indicators and general administrative capacity of the Member State.

The Commission analysed the requests for support submitted by the Member States in terms of their **eligibility** and **compliance** with these principles and criteria.

A practical two-step approach was undertaken:

- a) screening for eligibility and analysis of requests; and
- b) prioritisation of requests for selection.

As part of the assessment, the Commission undertook a broad internal consultation with all relevant Commission services in order to ensure complementarity and to avoid duplication of efforts and overlaps with several Union funds/programmes (in particular the ESI Funds). The process (including the broad consultation with other Commission services which fed into the assessment) resulted in the steps described below:

3.3.1. Step 1 - screening and analysis of the requests for support

Screening

Prior to assessing the requests submitted under the SRSP 2019 round, the Commission first established whether the requests met the legal requirements of the SRSP Regulation (eligibility check). Requests which included elements that were not 'eligible actions' under the SRSP Regulation (see Article 6) such as the purchase of equipment, provision of IT software, budget support measures, measures consisting of paying for running costs, etc., were excluded from further assessment.

²⁰ In accordance with Article 7(2) of the SRSP Regulation.

As a result of the first screening, 1% (6 requests) were excluded, and 99% (574 requests) proceeded to further analysis (eligible requests).

Analysis of the requests for support

Following the exclusion of ineligible and withdrawn requests, the purpose of the analysis was to identify the requests that merited support under the SRSP. The analysis was based on the principles and criteria set out in Article 7(2) of the SRSP Regulation.

A. General principles

Throughout the selection process, the <u>general principles</u> of the EU financial management rules (transparency, equal treatment and sound financial management) were applied.

Transparency:

The Commission maintained a dialogue with the Member States prior to the submission of their requests. This allowed clarifications to be provided and the Member States' requests to be refined, and adequate feedback on the assessment process after selection, in particular for requests which had not been selected.

Equal treatment:

The Commission applied the assessment criteria equally to all requesting Member States. There was no set pre-allocation of funding – the amount of funding allocated per Member State was determined based on the compliance of the request with the principles and assessment criteria and on the quality, focus and expected result of the support measures. In order to ensure equal treatment, a scoring system was put in place (see sections below).

Sound financial management:

The principle of sound financial management requires that EU financial resources are used in accordance with the principles of economy, efficiency and effectiveness. The Commission used the principle of sound financial management to prioritise requests based on quality, focus and expected results of eligible submitted requests.

B. Assessment criteria

The assessment criteria²¹ were applied in the following way:

i. Urgency of the request

The Commission assessed the urgency of a request, as initially presented by the Member State. It also took account of the following elements:

- whether the urgency was linked to a crisis;
- whether the urgency was related to a deadline or a time-bound schedule derived from Union law, or from Union/Commission policy priorities (e.g. European Semester, Economic Adjustment programmes, capital markets union (CMU), energy union, digital single market, etc.).

²¹ Defined in Article 7(2) of the SRSP Regulation.

ii. Breadth and depth of the problems identified

The Commission assessed the severity (breadth) and extent (depth) of the problem, as presented by the Member State. It also took account of the following elements:

- the Commission's own knowledge and assessment of the prevailing situation in the Member State;
- country reports, country-specific recommendations, annual reports on the application of EU law and other relevant documents related to Union/Commission priorities (energy union, CMU, etc.), as well as to Member States' own reform priorities, where known.

iii. Support needs in respect of the policy areas concerned

The Commission analysed support needs, as described in the requests by the Member States. It also took account of the following elements:

- at which stage of the reform process the support would be required (the design phase or the implementation phase) and how appropriate the solution proposed by the Member States would be to address it;
- whether the requested support measures were covered by already existing support measures/instruments (under national or Union (e.g. ESI Funds) programmes).

iv. Socio-economic indicators

The Commission took account of relevant socio-economic indicators (as they had been described by the Member States in their requests for support, or in another manner as appropriate) to support the assessment²².

v. General administrative capacity of the Member State

The Commission also assessed the capacity of the Member State (i.e. of the national authorities requesting support) to implement and absorb the support measures to be provided, and ensure adequate follow-up. The following elements were particularly taken into account:

- existence of a structure in the requesting Member State that would coordinate and follow up on the support measures;
- staff that would be made available to follow up on the support measures;
- capacity (also based on past experience) to manage support measures/projects.

Rating system

In order to ensure equal treatment, a rating system was put in place to assess how the eligible requests complied with the criteria indicated above.

Analysis based on general principles and criteria: rating system

Every request for support that was considered eligible received rating scores (A to C) that evaluated how well the assessment criteria and the principle of sound financial management were fulfilled. Scores were attributed for each of the following criteria: (i) urgency of the

²² These socio-economic indicators may be macro-economic indicators, general indicators or indicators related to the policy area concerned, such as unemployment rate, number of early education leavers, number of people in or at risk of poverty and social exclusion, investment rates, non-performing loans rates, etc.

request, (ii) breadth and depth of the problems identified, (iii) support needs in respect of the policy areas concerned, (iv) general administrative capacity of the Member State, (v) maturity, (vi) focus and (vii) expected results of the requested support measures.

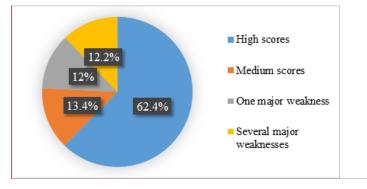

- requests with only high and medium scores and a majority of high scores fell into the category **high scores** (at least 4 As, no Cs)

- requests with only high and medium scores and a majority of medium scores fell into the category **medium scores** (at least 4 Bs, no Cs)

- requests with one low score fell into the category one major weakness (at least 1 C)

- requests with more than one low score and medium scores for the rest fell into the category **several major weaknesses** (more than 1 C)

62.4% of the 574 requests analysed in the SRSP 2019 round received high scores, 13.4% medium scores, and around 12% had either one major weakness, or several major weaknesses. The chart below shows the breakdown in percentages:

Commented [RS1]: This shape has been converted to an inline shape. Please check the position.

Figure 4: Requests by rating category

Compared to the SRSP 2018 round, there have been some notable changes. The percentage of requests rated with high scores increased from 58% to 62.4%. At the same time, the percentage of requests with several major weaknesses decreased from 17% to 12.2%. These changes seem to reflect an improved quality of the requests submitted by Member States.

Requests with high scores had in general the following characteristics:

- the problems/needs identified were sufficiently relevant/important and not covered by other Union funds/programmes;
- the solutions proposed were suitable for addressing the problems/needs;
- relevant socio-economic indicators underpinned the problems/needs at stake;
- the requesting Member State had sufficient administrative capacity to follow up the measure funded by the SRSP.

3.3.2. Step 2 – prioritisation of the requests for support

The results of the screening and analysis stage were used to select requests for funding under the budget of the SRSP 2019 cycle (\notin 79.3 million available, and \notin 194 million in requests received).

The requests were prioritised based on the principle of sound financial management (in particular taking into account their maturity, focus and expected results).

Without undermining the assessment criteria, the following aspects have also been considered and the priority has been given to:

- measures that were mature enough to allow for quick delivery of support and rapid implementation of reforms on the ground;
- targeted measures addressing defined objectives (as opposed to requests that were more generic or preparatory); and
- measures with a strong expected results on the ground.

3.4. Selection of requests

After the analysis and prioritisation of the 574 eligible requests for technical support, 263 requests from 26 Member States were selected for funding under the available SRSP 2019 budget of \notin 79.3 million. The distribution of selected requests by Member State was as shown below.

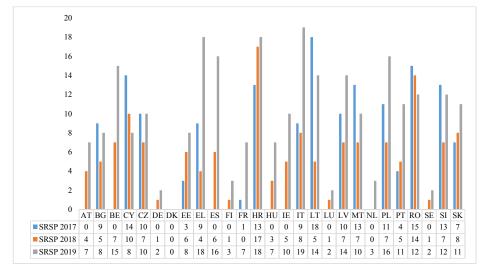

Figure 5: Number of requests selected for funding under the 2017 – 2019 SRSP rounds, per Member State

With an increase in the budget from $\notin 20.5$ million in the 2017 SRSP, to $\notin 30.5$ million in the 2018 SRSP, and further to $\notin 79.3$ in the SRSP 2019, the overall number of requests selected for funding under SRSP 2019 was higher than under the previous SRSP rounds, and also distributed across more Member States (26).

The distribution across the main broad policy areas was as shown below:

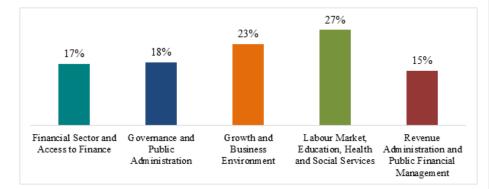

Figure 6: Number of requests selected for funding under SRSP 2019 – split per main broad policy area (in percentages)

By comparison, the highest number of requests selected for funding under the SRSP 2018 were in revenue administration and public financial management (24%). Under SRSP 2019, this category had the lowest number of requests (15%).

Also, in the area of governance and public administration the share of selected requests decreases from 21% to 18% under SRSP 2019. Moreover, there have been a significative increase in the number of requests selected for funding in the area of labour market, education, health and social services (from 21% to 27%), as well as in the financial sector and access to finance (from 11% to 17%).

The following chart shows the breakdown of the request selected under the SRSP 2019 budget and split according to relevant circumstances. As part of the EU's economic governance process, 4% (9 requests) were related to the preparation for euro area accession.

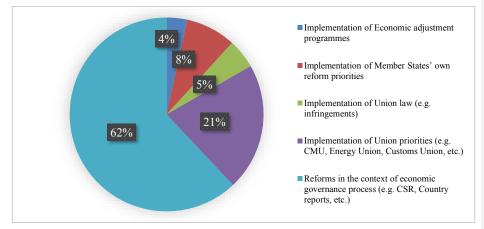

Figure 7: Number of requests selected under SRSP 2019 – split according to circumstances of the request (in percentages)

93.4% of requests selected for funding under SRSP 2019 round were given **high scores**. The chart below shows the distribution of the scores of the selected requests.

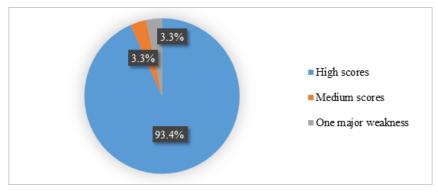

Figure 8: Rating of requests selected for funding under SRSP 2019²³

By way of comparison, 97% of requests selected for funding under SRSP 2018 were given high scores.

3.5. **Cooperation and support plans**

Once the requests for support had been selected, the Commission concluded a cooperation and support plan²⁴ with each Member State benefiting from the programme.

Cooperation and support plans

Member States and the Commission work closely together to carry out actions financed under the SRSP. After a Member State submits its request for support, the coordinating authority of the requesting Member State and the Commission agree on the priorities and objectives, an indicative timeline, the scope of the support measures and the estimated financial contribution for such support. This agreement is reflected in a cooperation and support plan (CSP). The CSPs are multiannual documents, signed and amended each year (if need be) by the Commission and Member States requesting support from the SRSP.

Implementation of the support measures requires full involvement and ownership by the Member State. The CSP is not a legally binding document, and it does not serve as a financing decision (the estimated global financial contribution is only indicative). However, through this document, the Commission and the Member States express their commitment to engage in the implementation of the support measures²⁵. Subject to consent by the Member States, the CSPs are transmitted to the European Parliament and the Council.

In 2019, 26 cooperation and support plans were concluded between the Commission and the Member States. They were sent to the European Parliament and the Council on 30 April 2019, in line with Article 8 of the SRSP Regulation.

²³ When lower-scored requests (one or several major weaknesses) were selected, it was because of the importance of the reform and relative urgency in that particular country. ²⁴ Article 7 of the SRSP Regulation.

²⁵ The content of the CSPs is further defined in section 18.2 and in part VII of the cooperation and support plans.

Country	Indicative timeline of delivery of	Estimated global
	support measures	contribution ²⁶
Austria	Q2 2019 – Q4 2022	€2,103,850
Belgium	Q1 2019 – Q2 2021	€2,602,450
Bulgaria	Q1 2018 – Q3 2021	€4,185,000
Croatia	Q2 2019 – Q1 2021	€4,935,000
Cyprus	Q1 2019 – Q2 2021	€2,770,000

3.6. Reform partners and special measures

In coordination with the Commission, the beneficiary Member State may enter into partnership with one or more other Member States which will act as reform partners to

 $^{^{26}}$ The estimated global contribution per Member State is purely indicative. The final amounts depend on how contracts, withdrawals, cancellations, etc, develop.

support specific areas of reform²⁷. In 2019, none of the requesting Member States entered into such a partnership.

Every year, a limited part of annual work programme is earmarked for special measures²⁸ in the event of unforeseen and duly justified grounds of urgency requiring an immediate response for a maximum period of 6 months. In 2019, none of the requesting Member States requested support under special measures.

3.7. Implementation of support measures

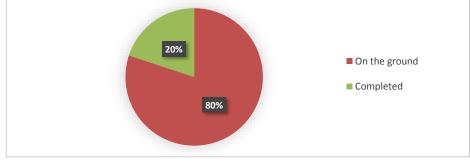

The 263 selected requests resulted in 259 projects (some selected requests were later withdrawn by Member States and some were merged for implementation purposes into one project). The 259 support measures are listed in Annex I. The distribution of support measures/projects per Member State and per policy area is shown in the table below.²⁹

²⁷ Article 9 of the SRSP Regulation

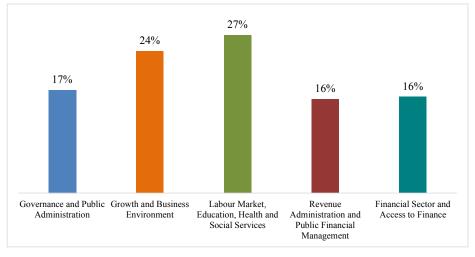

²⁸ Article 13(6) of the SRSP Regulation.

²⁹ The data presented in the table below are based on the updated information as of [31 November 2020]. The changes, as compared with the Annual Monitoring Reports for the previous years of SRSP implementation, occurred in the overall number of technical support projects due to various reasons – withdrawal of requests by Member States, merging of projects for implementation purposes, etc.

By 31 January 2021, **20%** of the reform support projects under SRSP 2019 had already been completed and **80%** continued to be implemented on the ground.

Figure 10: State of play SRSP 2019 project implementation

The distribution of projects across the main broad policy areas is illustrated in the chart below:

Figure 11: Projects by main broad policy area

Under SRSP 2019, the highest number of approved projects were in the area of labour market, education, heath and social services (27 %) and growth and business environment (24%).

The breakdown of specific actions (measures funded by the SRSP 2019 budget) supported in each policy area and each Member State is described in the chart below.

Governance and public administration	The SRSP provides support measures in 22 Member States in the fields of overall public administration, procurement, e- Government/Digital Public Administration, the functioning of the justice system, the fight against fraud, and corruption and money laundering. Certain measures could contribute to a better implementation of Union funds and programmes.			
Growth and business environment	The SRSP provides support measures in 23 Member States, in particular in the fields of investment climate, management of natural resources and resource efficiency, and the Energy Union.			
Labour market, education, health and social services	The SRSP provides support measures in 23 Member States, n particular in the fields of healthcare systems, education, training and research, labour markets and social policies, migration and social welfare systems.			
Revenue administration and public financial management	The SRSP provides support measures in 22 Member States, in particular in relation to revenue administration, tax policy, budget preparation and spending reviews, budget implementation and transition towards accrual accounting, and fiscal framework.			
Financial sector and access to finance	The SRSP provides support measures in 16 Member States, in particular in the fields of capitalmarket diagnostics and strategies, capital market development, insolvency and nonperforming loans, financial literacy and reinforcing financial stability.			

The largest proportion of support measures selected under the SRSP 2019 round and currently being implemented concern the following sectors/actions (see the figure below and Annex II for more details):

- Digital public administration (12.4%);
- Education and training (8.1%);
- Healthcare system (7.7%);
- Social protection and social services (6.6%);
- Capital markets union (6.2%);
- Governance (6.2%).

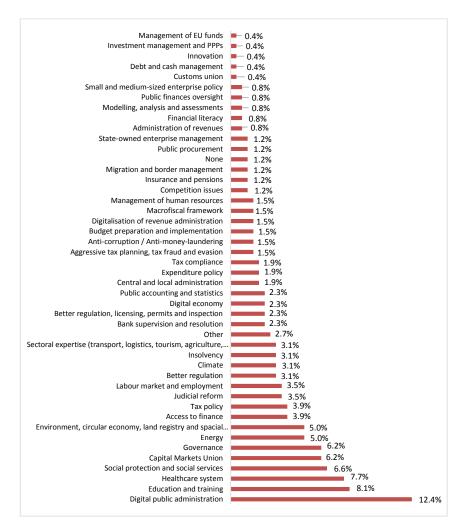

Figure 12: Sectors / actions covered by the support measures

259 different authorities were recipients of support measures funded under SRSP 2019. The type of beneficiary authority receiving support is shown in the chart below.

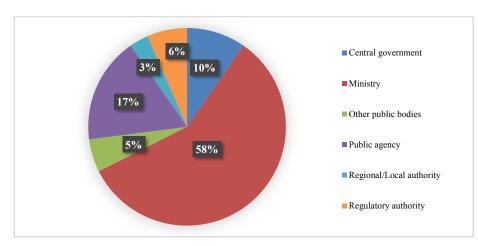

Figure 2: Type of beneficiary authority receiving support measures under SRSP 2019

The distribution of beneficiary authorities in each Member State is shown by type in the table below.

Means of implementation

The programme's support measures can be implemented either directly by the Commission or indirectly by entities and persons other than Member States³⁰. Financing of the support measures can take the form of grants, including grants to the Member States' national authorities, public procurement contracts, reimbursements of costs incurred by external experts, contributions to trust funds set up by international organisations, and actions carried out in indirect management.

By 31 January 2021, the SRSP 2019 budget of ${\ensuremath{\in}79.3}$ million was being implemented as follows.

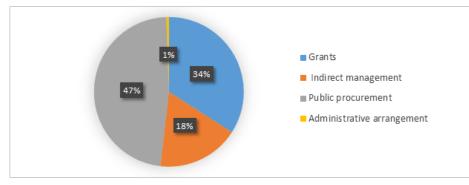

Figure 3: Breakdown of the means of implementing projects under the SRSP 2019 budget (% of budget)³¹

³⁰ Article 13 of the SRSP Regulation.

³¹ Values based on contracted amounts.

<u>Grants</u>

By 31 January 2021 (referring here only to projects selected for funding under the 2019 round), the majority of grants being implemented³² were awarded to international organisations (41%) and public law bodies (26%).

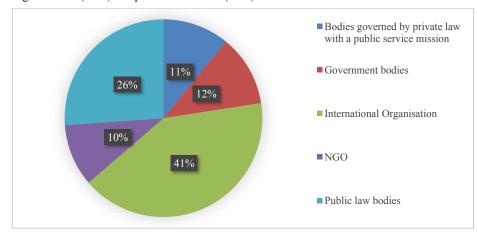

Figure 4: Types of technical support providers implementing grants in SRSP 2019 round

Public procurement and TAIEX

By 31 January 2021 (referring only to projects selected for funding under the 2019 round), the highest proportion of procurements were specific contracts based on framework contracts (88%) followed by direct procurement contracts for services (8%).

2% of the 2019 funding has been implemented through a Service Level Agreement entered into with DG NEAR to utilise the TAIEX³³ instrument under a programme entitled TAIEX SRSP Peer to Peer, which provided for expert exchange between Member States' administrations, 1% through simplified expert contracts for private sector experts (AMI list) and 1% through open tenders.

³² In accordance with the Commission Implementing Decision on the adoption of the work programme for 2019 and on the financing of Structural Reform Support Programme (C(2019) 1542 final) direct grants may be awarded to international organisations, Member States ministries, agencies or other bodies, as well as to other bodies with a public service mission which, in view of the nature of the action, have recognised and relevant technical competence, high degrees of specialisation or administrative power in various thematic areas under the SRSP.
³³ TAIEX is the Commission's Technical Assistance and Information Exchange instrument. TAIEX supports public

³³ TAIEX is the Commission's Technical Assistance and Information Exchange instrument. TAIEX supports public administrations in the approximation, application and enforcement of EU legislation as well as facilitating the sharing of EU best practices, <u>https://ec.europa.eu/neighbourhood-enlargement/tenders/taiex_en</u>

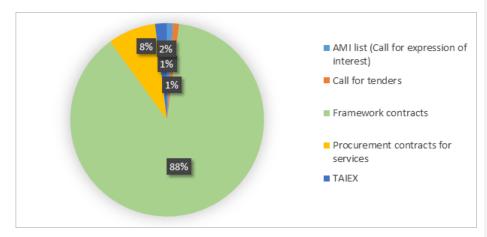

Figure 5: Types of procurement contract and TAIEX actions (value) ³⁴

Delegation agreement

By 31 January 2021 (referring here only to projects selected for funding under the 2019 round), the implementation of technical support projects was being indirectly managed by the international organisations, which have undergone an ex-ante (pillar-) assessment of their procedures and systems, guaranteeing a level of protection of the EU financial interests equivalent to that guaranteed by the Commission in direct management.

Administrative arrangements

By 31 January 2021 (referring here only to projects selected for funding under the 2019 round), three support meaures were implemented by the way of the administrative arrangements:

- administrative arrangement with the Joint Research Centre of the European Commission for provision of technical support for the microsimulation hub of the Council of Economic Advisors in Greece; and
- adiminstrative arrangement with the European Insurance and Occupational Pensions Authority (EIOPA) for increasing capacity to supervise the insurance sector in Croatia and Romania.

³⁴ Values based on contracted amounts.

4. PROGRESS IN RELATION TO THE PROGRAMME'S OBJECTIVES

Institutional, administrative and growth-sustaining structural reforms are, by their very nature, complex processes, the design and implementation of which require a complete chain of highly specialised knowledge and skills. In some Member States, the capacity to initiate and implement structural reforms is not always adequate to address the challenges ahead. Inadequate responses to economic and social challenges could hamper competitiveness, growth, employment, and investment. That is equally important for Member States whose currency is not the euro, in their preparation to join the euro area.

Considering the European dimension of these challenges, the SRSP aims to reinforce administrative capacity in the Member States and, by doing so, help the Member States implement institutional, administrative and structural reforms. Better administrative capacity can make administrative structures more efficient, benefiting the public and business.

To this end, through its support measures, the SRSP aims to achieve the following results:

- improved ability of national authorities to identify and address economic and structural weaknesses;
- strengthened ability to develop, design and implement reform policies according to priorities;
- improved capacity of national authorities to define processes and methodologies to support the design, management and implementation of reforms, and/or the efficiency and effectiveness of human resources;
- increased professional knowledge, skills and adaptability to change management processes;
- improved channels of communication with the Commission, Member States and international organisations in order to improve communication and coordination of reform efforts; and
- improved capacity to ensure progress of reforms recommended within the European Semester cycle, economic adjustment programmes and Member States' own-initiative reforms, and to ensure consistent and coherent implementation of Union law.

Against this background, the intervention logic of the programme can be illustrated in the chart below: the activities under the programme produce outputs, which in turn generate outcomes. The outcomes then contribute to the achievement of the specific objectives at the project and programme level. This in turn feeds into progress towards the general objective of the programme, which is to support growth-sustaining structural reforms in the Member States.

General objective of the Programme	Contribute to institutional, administrative and growth-sustaining reforms in the Member States by providing support to national authorities for measures aimed at reforming and strengthening institutions, governance, public administration, and economic and social sectors in response to economic and social challenges, with a view to enhancing cohesion, competitiveness, productivity, sustainable growth, job creation, investment and social inclusion and to contributing to real convergence in the Union, which may also prepare for participation in the euro area, in particular in the context of economic governance processes, including through assistance for the efficient, effective and transparent use of the Union funds.
Specific objectives of the programme/projects	 Support in designing reforms Support for the development and implementation of reform policies Support for the definition and implementation of processes and methodologies Support for more efficient and effective human resource management
Expected outcomes	 Adoption of a strategy Adoption of a draft of a new law, act or modification of an existing one Adoption of (new) procedures and actions to enhance the implementation of reforms Improved internal working procedures, methodologies and processes/organisation Organisational change, change management, improved human
Outputs	 Action plan, roadmap Guidelines, handbook Recommendation Terms of reference Legislative proposal Analysis, report Workshops (including material), training, training material Study visit reports Communication (including material) and other events
Activities	 Short term expert mission(s); Long term expert (resident expert and similar); Study visit (of officials of the beneficiary MS); Workshop/conference/seminar; Training activity; IT expertise/advice; Collection of statistics; Study, research, evaluation; Communication activities Compilation/dissemination of material (including through information technology systems) Organisation of local operations

Figure 17: Intervention logic of the SRSP

4.1. Progress in achieving the general objective

The general objective of the programme is to contribute to institutional, administrative and growth-sustaining reforms in the Member States by providing support to national authorities for measures aimed at reforming and strengthening institutions, governance, public administration, and economic and social sectors in response to economic and social challenges, with a view to enhancing cohesion, competitiveness, productivity, sustainable growth, job creation, investment and social inclusion and to contributing to real convergence in the Union, which may also prepare for participation in the euro area, in particular in the context of economic governance processes, including through assistance for the efficient, effective and transparent use of the Union funds³⁵.

While it is not within the remit of this report to illustrate the ultimate effects of the reforms³⁶ on which a Member State may have embarked and for which some support may be or is being provided under the SRSP, it can be said that overall the SRSP is on track when it comes to delivering on its general objective³⁷.

The support measures implemented under the SRSP have provided assistance to national authorities in the design and implementation of a whole range of institutional, administrative and structural reforms. The activities under the programme and the outputs already delivered under the SRSP 2017 – 2019 rounds (described below) help strengthen the overall capacity and sound governance of the requesting Member States.

Support measures are being implemented in those policy sectors for which institutional, administrative and/or structural reforms have been envisaged and/or should be undertaken by the Member States, also in view of the support provided.

The table below shows that the support measures under way in the requesting Member States and for projects selected for financing under the SRSP 2019 round contribute to the implementation of **institutional**, **administrative and structural reforms** that Member States face in **various economic and social sectors**, and which are being undertaken **in response to economic and social challenges**.

Contribution to institutional and administrative reforms	N° of measures
Effectiveness of the judicial system	7
• Efficiency and effectiveness of the public sector	20
Public financial management reforms	10
Anti-corruption/anti-money-laundering	7
Digital economy/digital public administration	24
Reforms improving the regulatory frameworks	5
Reforms in public procurements rules	2

³⁵ In accordance with Article 4 of the SRSP Regulation.

³⁶ According to Article 16 of the SRSP Regulation, the Commission shall provide an independent mid-term evaluation report with information on the achievement of the programme's objectives, the efficiency of the use of the resources and the programme's European added value, as well as the continued relevance of objectives and actions.

³⁷ Some external factors, such as changes in the political priorities of Member States, may influence the implementation of the support measures and there is therefore a risk that reforms for which support had been provided are not implemented in the end. For this reason, the causal link between the support measures provided under the programme and the achievement of the general objective has to be determined on a case-by-case basis and by taking account of external influencing factors.

•	Spending reviews	7
•	Tax administration reforms	23
Cont	ribution to economic-related and social-related reforms	
•	Sectoral expertise (transport, logistics, agriculture, etc.) projects	10
•	Enhancing competitiveness and productivity of SMEs	6
Ð	Implementing legal frameworks in environment, circular economy, water, land registry and spatial planning	16
•	Making healthcare systems more accessible, effective and resilient	19
	Investment management & public private partnerships	1
	Migration	2
•	Legal framework addressing insolvency and non-performing loans	9
•	Labour market policies	9
•	Capital markets union and access to finance Improving the quality and innovation of educational and training	24
syste		21
•	Social protection and social services	16
•	Bank supervision and resolution frameworks	6
•	Pensions and disabilities schemes	3
	Energy efficiency, energy poverty and renewables	12
гот	"AL	259

4.2. Progress in achieving the specific objectives

Support measures financed by the SRSP 2019 budget are contributing to the specific objectives of the programme as follows³⁸:

- 38% of support measures contribute to the design of reforms.
 - The majority of support measures contributing to this objective are in digital public administration, governance, tax policy and environment, circular economy, water, land registry and spatial planning.
 - 56% contribute to the formulation, development and implementation of reforms;
 - The majority of support measures contributing to this objective are in digital public administration, education and training, healthcare, social protection and social services.
- 59% contribute to the definition and implementation of processes and methodologies;
 - The majority of support measures contributing to this objective are in digital public administration, governance education and training, social protection and social services.
- 10% of support measures aim to help improve efficiency and effectiveness of human resources management.
 - The majority of support measures contributing to this objective are in access to finance and governance.

4.3. Expected outcomes of SRSP activities

In line with the intervention logic of the programme, the support measures financed under the 2019 SRSP budget are expected to achieve outcomes that will ultimately contribute to the achievement of the general and specific SRSP objectives as follows.

- 35% of support measures are expected to lead (or have led) to adoption of a strategy, draft of a new law or act, or modification of an existing one;
- 57% of support measures are expected to lead (or have led) to adoption of (new) procedures and actions to enhance the implementation of reforms;
- 53% of support measures strive to deliver (or have delivered) improved internal working procedures, methodologies and processes/organisation;
- 16% of support measures aim to bring about organisational change, change management and improved human resource management;
- 1% of support measures are expected to lead (or have led) to other results (assessment of software landscape, evaluation of public policies, etc.).

4.4. European added value

³⁸ Each support measure can contribute to more than one specific objective, which is why the sum of the figures appear to amount to more than 100%. See Annex III for a more detailed listing.

Actions implemented under the SRSP 2019 round are designed to ensure complementarity and synergy with other programmes and policies at national, Union and international level, contribute to further promoting mutual trust and cooperation between beneficiary Member States and the Commission, and ensure consistent and coherent implementation of Union law. In addition, some actions should allow for the development and implementation of solutions that address national challenges but also have a positive cross-border impact and/or impact on the Union as a whole.

The Commission is in a better position than any single Member State to identify and channel good practices. In many instances, therefore, support measures delivered to the Member States have been improved by the exchange of good practices among the Member States and between Member States and international organisations. This also enabled efficiency gains, as positive results in one Member State could be implemented in another.

Support measures implemented under the SRSP 2019 are expected to generate European added value, as the following examples illustrate³⁹.

- 33% of support measures are expected to have an impact on cross-border or Union-wide challenges:
 - The same measures for example are being provided to national promotional banks to help with their participation in InvestEU, an EU-wide initiative; or for the introduction of digital justice to, among other things, facilitate international and European judicial cooperation.
- 37% are expected to complement other Union programmes⁴⁰:
 - Support measures provided under the SRSP 2019 for example helped elaborate action plans to transition from coal and identify sources of financing under the Union funds to finance the transition.
- 54% are expected to contribute to the consistent and coherent implementation of Union laws and policies:
 - Support measures provided under SRSP 2019 are helping Member States implement sustainable mobility, design insolvency frameworks, design and implement anti-corruption measures, prepare circular economy roadmaps and legislations, or support adult education.
- 51% of support measures are expected to contribute to the sharing of good practices, also with a view to increasing the visibility of the programme:
 - Support measures provided under SRSP 2019 for example involved mproving the institutional capacity of national authorities in the area of local financial management and investment programming through exchange of best practice.
- **24% are** expected **to promote mutual trust** between the beneficiary Member State and the Commission and between Member States:
 - Support measures for example allowed for capacity building at the local level to use classification of data methodology for local social benefits or to help design and deploy a digital strategy to increase transparency and efficiency of the administration.

³⁹ Each support measure can contribute to more than one element relevant to European added value.

⁴⁰ Other Union funds or programmes, such as the European Structural and Investment Funds (ESIF) or other Community programmes.

5. DELIVERED SUPPORT MEASURES UNDER THE PROGRAMME

The third year of implementation of the SRSP is showing concrete results. By 31 January 2020, 276 of the projects implemented under 2017 - 2019 SRSP rounds have already delivered concrete results⁴¹.

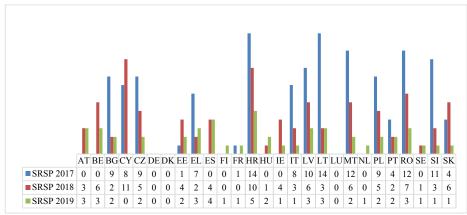

Figure 6: Number of completed projects under the SRSP 2017 – 2019 rounds, per Member State

While the outputs of the individual projects are known (a draft law, strategic and legal advice, studies, training, workshops, recommendations, actions, plans, etc.), the report does not systematically evaluate the extent to which the Member State authorities have used the results of the support measures to design or implement reforms (the outcome).

DG REFORM established a mechanism to evaluate the outcomes in order to assess the extent to which the support provided to Member States met its goals and to identify factors which influenced the successful delivery of the support measures.

Under this mechanism, authorities benefitting from the programme provide feedback on the support provided (the outputs) and information concerning follow-up actions taken several months after delivery of the support measures.

Some illustrative examples of actual results of the support delivered, and the use of these measures by Member States where available, are provided below.

⁴¹ The implementation period covered by this report (of support measures selected for funding in 2018) is 31 August 2017 - 31 January 2021.

Contribution to institutional and administrative reforms

Reform of the interior sector in Latvia (SRSP 2018)

In the context of Latvia's Public Administration Reform Plan 2020, DG REFORM supported In the concast of the latvia state reaction which accounts for the largest share of the Latvian state budget. With expertise drawn from Estonia, Lithuania and Finland, the project presented concrete proposals for the reform of the State Police, the State Fire and Rescue Service and the Office for Citizenship and Migration Affairs.

The recommendations for organisational and functional changes, as well as the proposal for performance management systems, are being implemented. Moreover, the project led to further reform initiatives and projects in the interior sector.

Evaluation of the position and performance of the Council for Budget Responsibility in Slovakia (SRSP 2019)

DG REFORM supported the Council for Budget Responsibility in Slovakia in modernising their modelling methods for estimating the immediate, behavioural and aggregate fiscal effects of potential tax and transfer policy initiatives. The technical support focused in particular on: · creating a data set based on administrative data;

· adjusting the microsimulation tool to enable it to run the new data set.

In the long run, the adapted tool will contribute to more reliable and improved estimates. These could improve the fiscal assessment of future tax reforms, the evaluation of income equality and poverty and the evaluation of the impact of tax reforms on individual and household disposable income.

Implementing the digital strategy in Italy (SRSP 2018)

The Directorate for IT Systems and Innovation of the Italian Ministry of Economy and Finance is responsible for the digital transformation, promoting innovation and supplying IT services. It also provides shared payroll services and other services to the wider Italian public sector. It manages around EUR 52 billion in payments each year.

Following a reform of the administration, the human resources service provision was centralised. Italy's digital strategy provided for a largescale digital transformation of the HR system for public sector staff. As a result, the directorate's client base increased from 2 million employees in 100 public organisations to 3.3 million employees in 10 000 organisations. DG REFORM supported the design of the management reform needed to undertake such a change.

Modernizing tax filing in Austria (SRSP 2019)

DG REFORM is supporting the Federal Ministry of Finance in modernising and digitalising the tax filing system in Austria. This project will pave the way for the development of a new IT system by providing the authorities with:

· an analytical report on strengthening the risk-based approach for assessing tax returns;

· technical specifications for a new IT solution with an algorithm for risk analysis.

Once implemented, the new IT solution will contribute to streamlining and automating the processes for assessing taxes; providing faster results with a higher quality of risk analysis and reducing the administrative burden for the tax authorities.

Improving the quality of the state budget preparation process in Croatia (SRSP 2018)

DG REFORM is supporting the Croatian Ministry of Finance to improve the quality of the state budget preparation process. The support is contributing to improving the management of public resources and achieving greater efficiency and transparency of budget planning and spending. A successful pilot project focused on upgrading the quality of budget preparation and justification by state budget users in seven ministries. DG REFORM is providing further support to other state budget users in the administration.

Sustainable budgeting and financial management in Ireland (SRSP 2018)

The Irish performance budgeting framework needs improvements to be used for sustainable budgeting and reporting. DG REFORM will support the development and roll-out of a new outcomes-based budgeting framework, measuring the performance of public policies against both sectoral objectives and cross-cutting priorities like climate or equality. The project will aim to improve resource prioritisation, the evaluation of public policies and the uncontributive of early in the project will a sector of public policies and the sector of the sector of the sector of the sector of public policies and the sector of the accountability of public managers.

Awareness campaign strategy to reduce the shadow economy in Lithuania (SRSP 2018)

The Commission supported national authorities in their fight against tax evasion and the shadow economy by designing a comprehensive communication campaign strategy and the necessary elements to help the government implement it.

The support provided tailored expertise and consultancy over 9 months.

It consisted of: research and preparatory analysis of the national context in which the campaign would take place, to set the scene and to define the most customised and relevant strategic approach; development of a comprehensive and tailormade communication strategy; and support for the implementation (training and hotline) and monitoring (key performance indicators).

Contribution to economic-related and social-related reforms

Improving the implementation of the European maritime and fisheries fund in Spain (SRSP 2018)

The implementation of the European Maritime and Fisheries Fund (EMFF) in Spain had the imperintential delays, affecting the fund's absorption. Two key issues identified were the complex governance scheme, involving several players at national and regional levels, and the difficulty to apply the appropriate rules to the regional specificities.

DG REFORM provided technical support to the Spanish managing authority of the EMFF. The main objective of the project was to improve the authority's management capacity and enhance the overall performance and use of the fund. The project provided recommendations and an action plan to reinforce the institutional capacities of the bodies involved in the management of the EMFF.

Inland waterway transport in Poland - the Oder Waterway (SRSP 2018)

The Commission helped the Polish authorities to develop a cost-benefit analysis and a communication strategy underpinning the modernisation of the Oder Waterway. The objective was to enhance the Ministry's capacity to plan and manage an increase in the inland navigation in Poland

The support was provided over 14 months. It aimed to help develop sound methodologies, analyses and customized tools for the development of the Oder Waterway, and enhance the Ministry's capacity to plan such investments in the future.

Support measures consisted of: a sound cost-benefit analysis and a methodological framework for analysing the ways to modernise the Oder Waterway; and a communication strategy underpinning the development of the policy on inland waterways

Support for the creation of a crisis management manual in Czechia (SRSP 2019)

DG REFORM is supporting the national resolution authority in drafting a detailed crisis management manual. This manual will enable the resolution authority to fully operationalise all management manual. This manual will enable the resolution authority to thus operationalise and the necessary steps, processes and procedures that are needed if a financial institution is determined to be failing or likely to fail. The technical support includes identifying missing procedures and processes in the national resolution framework, providing step-bystep guidance on the implementation of all possible resolution tools and preparing notification and decision templates. The project also includes a resolution simulation exercise.

Alternative Investment Funds in Slovenia (SRSP 2019)

The Commission has helped national authorities in Slovenia strengthen alternative investment funds.

The support provided by DG REFORM and a private provider consisted of an independent analysis of the regulatory and legal framework for alternative investment funds in Slovenia. It included studies, a gap analysis and the flagging and prioritising of areas for improvement. The support also included workshops with a wide range of fund managers and market participants.

The support delivered the following results: a comprehensive analysis of alternative investment funds in Slovenia (private equity funds and real estate funds), with a legal review and regulatory recommendations.

And had the following impact: improved regulatory framework for alternative investment funds and a positive effect of the Slovenian capital markets.

Reforming the assessment of disability in Greece (SRSP 2019)

The Commission is supporting several national authorities in their efforts to (i) modernise the administrative processes in the field of disability assessment, and (ii) review the disability assessment by moving from a medical impairment-based approach towards a more holistic assessment of disability which takes into account functional capacity and individual circumstances.

Support is provided in the following areas: organisational development; review of business & IT processes; communication & customer services; human resources: training needs analysis & programme; review of the assessment methodology; and design of a pilot programme.

Implementing a primary health care reform in Austria (SRSP 2018)

The Commission is supporting national authorities in their efforts to implement a primary health care reform and provide effective start-up services to primary care units to enable health professionals to start their own primary health care units.

The support planned by DG REFORM is built on the following components: creating a startup guide with information for health professionals for the successful establishment of a Primary Health Care Unit; creating support material and providing training sessions for the Social Health Insurance and regional Governments on the availability and use of financial instruments for Primary Health Care Units; providing hands-on consultancy services to help start up Primary Health Care Units; and designing a website and a communication strategy.

Transformation of a national development institution in Spain (SRSP 2019)

The Spanish Government lists the fight against climate change amongst its top priorities. Instituto de Crédito Oficial plays a key role in working towards fulfilling these objectives. DG REFORM helps to:

- facilitate the institute's categorisation of financing activities following EU taxonomy;
- support the institute in financing new sectors and using new financial instruments;

• identify the processes needed to improve its green and social bonds programmes and impact measurement.

The project will enable Instituto de Crédito Oficial to increase its capacity to finance sustainable projects and measure their economic and social impact.

6. CONCLUSION

Reforms are crucial to modernise the economies of the Member States and to encourage investment, create jobs and raise living standards. The successful implementation of reforms requires **good administrative capacity** and **a high sense of ownership of the reform process by the Member State concerned**. The SRSP aims to help Member State authorities in their efforts to design and implement growth-enhancing reforms.

The third year of the implementation of the SRSP showed an increase in demand for the programme from Member States -26 Member States submitted 580 requests for support (the SRSP 2018 round saw 444 requests for support from 24 Member States). This is the first indication that the support provided by the Commission is relevant and needed.

This report has also described how the Commission has **implemented the measures funded under the SRSP 2019** and how it is **monitoring actions** finalised under the SRSP 2017 and 2018 rounds.

Overall, three years of implementation of the SRSP have shown that the programme can provide the necessary assistance to the national authorities to identify and overcome certain structural weaknesses and bottlenecks in the design or implementation of reforms. Likewise, it has so far proven to be a significant tool in improving the Member States' capacity to define more efficient processes and methodologies and/or progress towards more effective human resource management. A number of concrete examples of results and follow-up actions by the governments demonstrate this.

In addition, with the view of continuing to provide technical support to Member States after the end of the SRSP in 2020, the European Parliament and the Council adopted a Regulation establishing the successor of the Programme - the Technical Support Instrument⁴² - with a similar scope and objectives.

While results of the support actions carried out under the SRSP contribute to the reform processes, effective follow-up of such actions in terms of concretisation of reforms remain the prerogative of the recipient Member State.

In the years to come, the Commission will continue to monitor the uptake of the support measures, as well as the implementation of institutional, administrative and growth-enhancing reforms.

⁴² Regulation (EU) 2021/240 of the European Parliament and of the Council of 10 February 2021 establishing a Technical Support Instrument, OJ L 57, 18.2.2021, p. 1 – 16.
