Introduction

The country nomenclature for the external trade statistics of the Community and statistics of trade between Member States - known as the "geonomenclature", abbreviated to GEONOM - is an essential element in compiling these statistics. In particular, it makes it possible to identify those involved in trade, i.e. the reporting country and the partner country.

The creation, maintenance and use of this nomenclature are laid down by Article 9 of Council Regulation (EC) No 1172/95 of 22.05.1995 (OJ L 118 of 25.05.1995) on the statistics relating to the trading of goods by the Community and its Member States with non-member countries. As for the statistics on intra-Community trade, Article 22 of Council Regulation (EC) No 1901/2000 of 07.09.2000 directly defines the codes to be used by the fifteen Member States for their intra-Community commercial transactions.

The geonomenclature is subject to annual revision in order to incorporate the adjustments needed for statistical purposes and to take into account any geopolitical changes that may have occurred. Commission Regulation (EC) No 2020/2001 of 15 October 2001, which lays down the geonomenclature applicable for 2002, was published in OJ L 273 of 16 October 2001.

The purpose of this publication is to provide users with all the supplementary information on the GEONOM 2002 that is essential to understand its content and to illustrate the changes in country codes in order to facilitate analysis of the results of the statistics on the European Union's external trade.

With a view to improving the next edition and providing a better response to users' needs, any corrections or comments would be welcome.
