

# THE GDP OF THE CANDIDATE COUNTRIES

*Silke Stapel*

## Figures for the second quarter of 2000

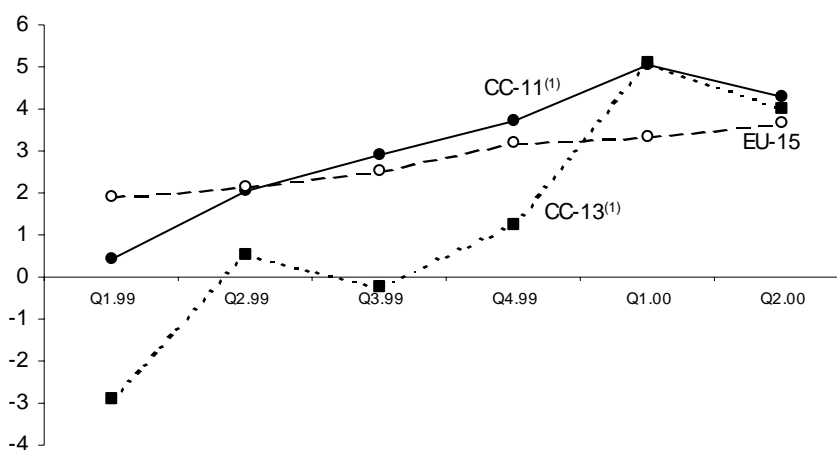

In this publication, Eurostat presents the latest quarterly GDP growth rates for the Candidate Countries (CCs). The CCs comprise Bulgaria, Cyprus, the Czech Republic, Estonia, Hungary, Latvia, Lithuania, Malta, Poland, Romania, the Slovak Republic, Slovenia and Turkey. The most recent data published relate to the second quarter of 2000, and were submitted by the CCs by 31 October 2000.

Annual figures for 1999 are also shown, though more detailed breakdowns and analysis can be found in *Statistics in Focus no. 27/2000 (Theme 2)*.

Table 1 (overleaf) illustrates the quarterly growth figures back to the first quarter of 1999. The trend for the CCs as a whole is shown below in Figure 1, along with a comparison against the EU-15.

The growth rates are based on changes between corresponding quarters in successive years. GDP growth in the CCs as a group (both CC-11 and CC-13) slipped in the second quarter of 2000 after peaking above 5% in the first, but remained above the EU-15 average. Only Bulgaria, Estonia, Romania and the Slovak Republic saw growth improve, with Estonia recording the highest figure of 7.4%.

**Figure 1: Quarterly GDP growth (% change on same period in previous year)**

*Note: The CC-13 aggregate includes all of the CCs for whom data are available (Cyprus does not publish quarterly growth rates). CC-11 does not include Malta or Turkey and is shown for purposes of comparison with previous publications.*

Figure 2 and tables 2 and 3, provide an illustration of the latest annual GDP data at current prices, both in euro and Purchasing Power Standards (PPS).

Regarding data quality, eleven countries are working towards ESA 1995 compliance while Turkey bases its accounts on SNA 1968 but is working towards SNA

1993. Malta, however, is using a dated system established in 1954 with some elements of SNA 1968. The statistics in this publication should therefore be interpreted with an appropriate level of caution – full comparability with EU Member States cannot yet be guaranteed.

(1) Total refers to the countries for whom there are available data

(2) Based on GDP at constant prices in national currency

(3) For the calculation of GDP per head, the data for the total population is taken from the National Accounts; it may differ from that obtained via demographic statistics

(4) The PPPs used to calculate the data at PPS are provisional estimates. The basis of these estimates is the 1996 European Comparison Programme (ECP) results published by OECD/Eurostat. In the case of Poland and Cyprus, the results of the 1997 ECP are used

Data Sources: Where not otherwise specified, data are supplied by the Statistical Offices of the CCs to Eurostat in the form of a quarterly National Accounts data questionnaire. Data for Turkey were supplied to Eurostat in a general statistical questionnaire, with historical quarterly data for Turkey taken from its Statistical Office website.

This report was prepared using contributions from Wayne Codd and Sebastian Reinecke.
