

QUARTERLY ACCOUNTS

Output Side – Third Quarter 2000

Business activities and financial services largest contributor to GDP growth

Ingo KUHNERT

Eurostat's estimates ⁽¹⁾ concerning the third quarter of 2000 show that GDP growth slowed both in the euro-zone ⁽²⁾ and in the European Union as a whole (EU-15), reaching 0.6%, in comparison with 0.9% in the second quarter 2000. Compared to the third quarter of 1999, the GDP of the euro-zone and of the EU-15 grew by 3.3% for both zones.

Total Gross Value Added (GVA) grew by +0.9% in the euro-zone and +0.8% in the EU-15, after an increase of +0.7% and +0.8%, respectively, during the previous quarter. Compared to the third quarter of 1999, GVA slowed down to 3.7% for the euro-zone and 3.6% for the EU-15 after a growth of 3.8% for both zones in the previous quarter.

The single largest contribution to GDP growth was observed in the branch of *Business activities and financial services* (+0.3 of GDP variation in both the euro-zone and the EU-15), followed by *Industry* (+0.2 for both). *Trade, transport and communication* recorded a positive pace although its contribution was less important than in the previous quarter (+0.1 of GDP variation). The *Other business activities* branch confirmed the results of the previous quarter (+0.1 of GDP variation) whilst *Agriculture, hunting and forestry* and *Construction* had virtually no effects on GDP growth (0.0 of GDP variation).

⁽¹⁾ Methodological note: data for the euro-zone and the EU-15 are calculated in a coherent statistical framework, using as indicators the data of all the Member States compiling quarterly accounts. Aggregations for the euro-zone and the EU-15 were carried out using the seasonally adjusted data of the Member States. These data are also corrected for working days for Germany, Spain, France, the Netherlands and the United Kingdom.

⁽²⁾ The euro-zone consists of Belgium, Germany, Spain, France, Ireland, Italy, Luxembourg, the Netherlands, Austria, Portugal and Finland. Greece will be included starting from the publication covering the first quarter 2001.

DEVELOPMENT OF GDP AND GVA BY INDUSTRY

EURO-ZONE and EU-15

Eurostat's estimates concerning the third quarter of 2000 show that GDP growth slowed both in the euro-zone and in the European Union as a whole, reaching +0.6%, down from +0.9%, recorded in the second quarter 2000.

Total Gross Value Added (GVA) grew by +0.9% for the euro-zone and by +0.8% for the EU-15, after an increase of +0.7% and +0.8%, respectively, during the previous quarter. Compared to the third quarter of 1999, the GVA recorded a growth of +3.7% and +3.6%, respectively.

Concerning the branches of economic activity, an accelerated growth of gross value added rate was observed in the branch of **Business activities and financial services** (+1.4% in the euro-zone and +1.3% in the EU-15, following values of +0.9% and +1.1%, respectively, in the previous quarter). This branch was thus the one with the highest growth rates in the course of the third quarter 2000.

Agriculture (+1.3% and +0.9%, respectively) recorded a positive result after the weaker figures of the previous quarter, where gross value added had been diminishing in the euro-zone (-0.2%) and stagnating in the EU-15 (0.0%).

Growth in **Industry, including Energy** remained virtually unchanged on a relatively high level (+1.0% for both zones compared to second quarter growth rates of +0.9% in the euro-zone and 1.0% in the EU-15).

Gross value added in **Other services** exhibited a stable growth, the growth rate attaining +0.5% in both zones, following +0.5% for the euro-zone and +0.6% in the EU-15 in the previous quarter.

Trade, transport and communication services recorded a slowdown of growth to +0.6% in both zones, while the corresponding figure in the second quarter 2000 had been +1.2% for both.

Construction accelerated as well, recovering in the euro-zone (+0.1%) if not in the EU-15 (-0.2%). This compares to -1.1% for the euro-zone and -1.2% for the EU-15 in the second quarter of 2000. Nevertheless, construction still showed the weakest growth rate of all branches during the third quarter of 2000.

The Member States of the European Union

During the third quarter of 2000, the growth of the EU Member States' Gross Value Added was rather heterogeneous: the growth of total gross value added slowed in the United Kingdom (+0.7%), France (+0.5%), Spain (+0.5%), Austria (+0.1%) and Denmark (+0.1%). In contrast, an acceleration was recorded in Finland (+2.0%), Germany (+1.1%), Italy (+0.8%) and Belgium (+0.5%), while a recovery was noticed in Portugal (+1.6%).

Concerning the production branches, **Agriculture** recorded a +6.9% growth in the Netherlands and a -4.9% fall in Denmark. The **Construction** industry registered its highest growth in Portugal (+1.9%) and its lowest in Denmark (-5.3%). In **industry, including energy**, a +4.8% growth rate was recorded in Portugal and one of -0.5% in Austria. The other branches showed, more or less, a common behaviour, for example **Business activities and financial services** recorded the highest growth in Finland (+2.0%) and the lowest in Portugal (+0.4%).
