

The GDP of the Candidate Countries

Jarko Pasanen

Figures for the third quarter of 2001

In this publication, Eurostat presents the latest quarterly GDP growth rates for the Candidate Countries (CCs). The CCs comprise Bulgaria, Cyprus, the Czech Republic, Estonia, Hungary, Latvia, Lithuania, Malta, Poland, Romania, the Slovak Republic, Slovenia and Turkey. The most recent data published relate to the third quarter of 2001 and annual figures for 2000 are also shown. For the first time, Eurostat are able to publish quarterly growth rates for Cyprus.

Table 1 (overleaf) illustrates the quarterly growth figures back to the second quarter of 2000. The trend for the CCs as a whole is shown below in Figure 1, along with a comparison against the EU-15.

The growth rates are based on changes between corresponding quarters in consecutive years. The third quarter of 2001 saw modest stabilisation in the CCs with six countries enjoying higher growth rates than in the second quarter. Malta and Turkey both suffered again from contracting GDP, but at slightly less severe levels. Romania improved its growth rate for the third successive quarter, surging to 6.8%, the highest figure in the CCs for the third quarter of 2001.

Figure 2 and tables 2 and 3, provide an illustration of the latest annual GDP data at current prices, both in euro and Purchasing Power Standards (PPS).

Regarding data quality, all Candidate Countries are working towards ESA95 compliance but this is a long and difficult process. In particular, Turkey currently

bases its accounts on SNA 1968 and Malta's data are derived from the national system of 1954, with some elements of SNA 1968. Therefore, all data in this publication should still be treated with an appropriate level of caution, as full comparability with EU Member States cannot yet be guaranteed.

(1) Based on GDP at constant prices in national currency, non-seasonally adjusted

(2) Q3 2001 figure for Cyprus is preliminary and subject to revision

(3) For the calculation of GDP per head, the data for the population total is taken from the National Accounts; it may differ from that obtained via demographic statistics

(4) The basis of the estimates in PPS are the 1999 European Comparison Programme (ECP) results recently published by OECD/Eurostat

Data Sources: Data are supplied by the Statistical Offices of the CCs to Eurostat in the form of a quarterly National Accounts data questionnaire.
