QUARTERLY ACCOUNTS

First Quarter 2003

Output Side

Ingo KUHNERT

Eurostat estimates ⁽¹⁾ concerning the first quarter 2003 show that the growth with respect to the previous quarter of Gross Domestic Product (GDP) in the euro-zone ⁽²⁾ and in the European Union (EU15) reached 0.1% (+0.1% for both also during the previous quarter).

The growth of total Gross value added (GVA) during the first quarter 2003 was 0.1% in the euro-zone as it had been in the previous quarter, and it slowed down from 0.2% to 0.1% in the EU15.

Compared to the same quarter of the previous year, GDP growth reached 0.9% in the euro-zone and 1.1% in the EU15, whereas GVA increased by 1.0% in the euro-zone and by 1.2% in the EU15.

None of the branches of economic activity gave a significant positive contribution to GDP growth in the euro-zone, where significant means a contribution larger than 0.05 percentage points GDP growth. The contribution of *Construction* was even negative (-0.1 of GDP variation). The sum of the small positive contributions made by the other branches yet amounted to a +0.1 contribution made by total gross value added to GDP growth. The situation in the EU15 was essentially the same, with the only difference that the contribution of the *Business activities and financial services* branch was just big enough to account for +0.1 of GDP variation.

⁽¹⁾ *Methodological note: data for the euro-zone and EU15 are calculated in a coherent statistical framework, using as indicators the data of all the Member States compiling quarterly accounts. Aggregations for the euro-zone and EU15 were carried out using the seasonally adjusted data of the Member States. These data are also corrected for working days for Belgium, Germany, Spain, France, Italy, the Netherlands, Austria, Sweden and the United Kingdom.*

⁽²⁾ *The euro-zone consists of Belgium, Germany, Greece, Spain, France, Ireland, Italy, Luxembourg, the Netherlands, Austria, Portugal and Finland*

DEVELOPMENT OF GVA BY INDUSTRY

The euro-zone and the EU15

Total gross value added of the *Agriculture* branch increased by 1.0% in the euro-zone and by 0.6% in the EU15 during the first quarter 2003 (-0.5% and -0.4%, respectively, during the previous quarter). This branch showed the highest growth rates of all the branches during the first quarter of 2003.

GVA of the *Industry* branch during the first quarter 2003 recovered to +0.2% growth in the euro-zone and to +0.1% growth in the EU15 (-0.5% and -0.4%, respectively, during the previous quarter).

The branch of *Construction* showed a sizeable negative development in the euro-zone during the first quarter 2003, the rate of variation passing to -1.8% after 0.0% in the previous quarter. In the EU15, GVA decreased by 1.4%, after +0.3% growth in the previous quarter.

GVA growth in the *Trade, transport and communications* branch was slower than before, at 0.1% in the euro-zone and at 0.2% in the EU15 (after +0.2% and +0.3% respectively in the previous quarter).

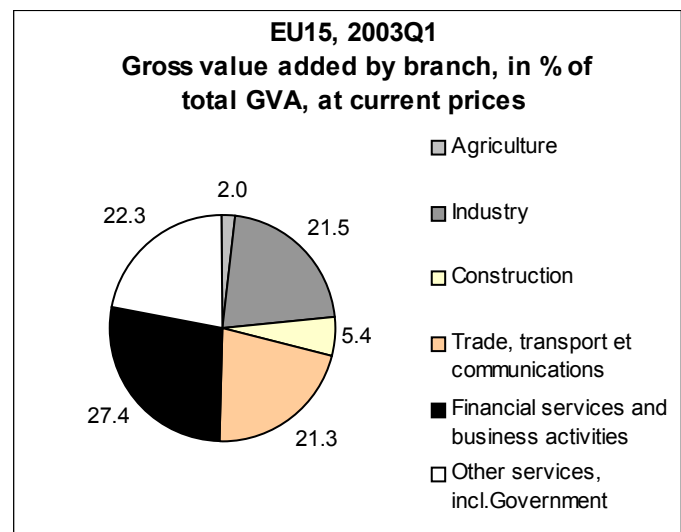

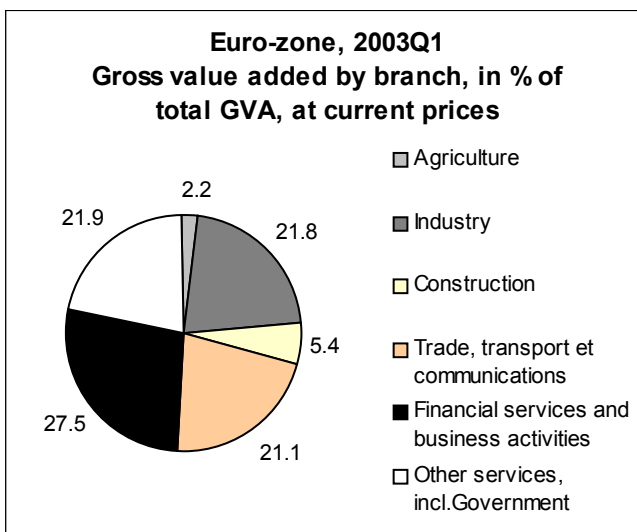

The growth of the *Business activities and financial services* branch also slowed down in the first quarter 2003, passing from 0.3% to 0.1% in the euro-zone and from 0.4% to 0.2% in the EU15.

The GVA growth rate of the *Other service activities*, during the first quarter of 2003 decelerated significantly both in the euro-zone and in the EU15, reaching 0.1% and 0.2%, respectively (+0.6% and +0.5%, respectively during the previous quarter).

The Member States of the European Union

During the first quarter 2003, growth of total GVA was better than in the previous quarter (regardless of sign) in five Member States, it was worse than before in another five and remained unchanged in one, namely Belgium. For the remaining four Member States, no respective figures are available. The highest growth rate for GVA was recorded in Denmark (+0.7%) and Austria (+0.5%) while the only reductions were seen in Finland (-1.3%), Portugal (-0.8%) and Germany (-0.1%).

Agriculture, forestry and fishing saw its maximum growth in Spain (+3.4%) and Italy (+2.3%) and the strongest fall in Belgium (-5.3%), followed by another seven Member States with negative rates of change. For *Industry, including energy*, the best values were those of Germany (+1.5%) and Austria (+1.4%); Finland recorded the strongest reduction (-4.1%), and another five Member States also posted negative changes. The highest growth for *Construction* was observed in the United Kingdom (+2.1%); the most noticeable falls were recorded in Denmark (-5.2%) and Germany (-5.1%), followed by five other Member States that also saw GVA decline. The *Trade, transport and communications* branch marked its best performance in Spain (+1.4%) and Finland (+1.0%) while reductions were observed only in Germany (-0.3%), Portugal (-0.2%) and the Netherlands (-0.1%). Growth in *Business activities and financial services* peaked in Sweden (+1.8%), followed by Spain (+1.2%). On the other side, slightly negative rates of change between -0.1% and -0.2% were recorded in Germany, Austria, Portugal, Italy and Finland. Finally, the highest growth of the *Other services* branch was noticed in Denmark (+2.0%), the most significant falls were those seen in Portugal (-1.0%) and Finland (-0.7%).
