

# EU Labour Force Survey

## Principal results 2005

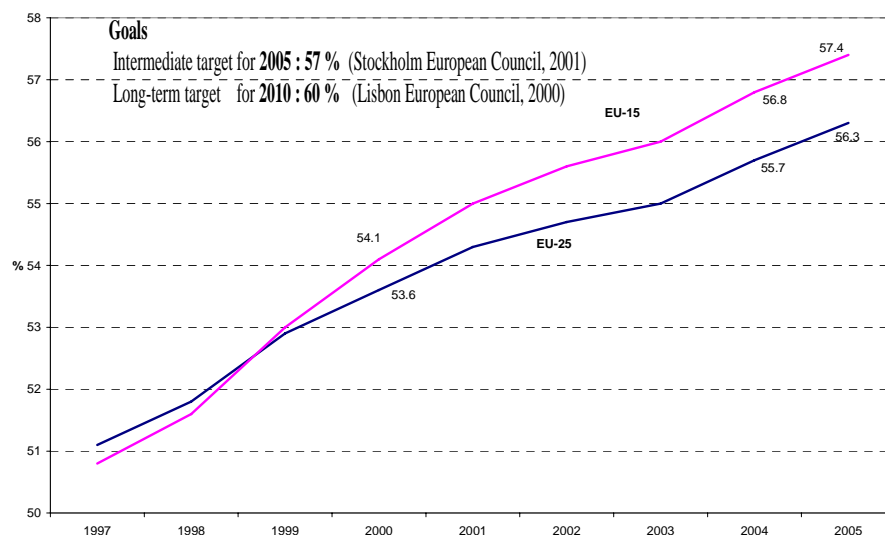

This publication gives the 2005 annual results of the European Union Labour Force Survey (LFS), among the 380.3 million people aged 15 and more living in private households in the EU-25:

→ 197.5 million people resident in the European Union held a job or had a business activity during the reference week of the survey, of which 44.1% were women.

-The employment rate, which measures the share of employed people in the population aged 15 to 64 years, stood at 63.8% in 2005 in the EU-25, 3.2 percentage points below the 2001 Stockholm European Council target for 2005<sup>1</sup>.

- The female employment rate reached 56.3% in the EU-25 (0.7 points below the Stockholm mid-term target). This is the result of a continuous increase in female participation in employment since 1997<sup>2</sup>. In Denmark, Estonia, the Netherlands, Austria, Portugal, Finland, Sweden and the United Kingdom, more than 60% of the women aged 15 to 64 were employed. In Greece, Italy, Malta and Poland, this proportion was below 50% in 2005.

**Figure 1 – Female employment rates, age 15-64, 1997 – 2005**

Source: Eurostat, EU-LFS<sup>3</sup>

- The employment rate of older people (55 to 64 years old) was 42.5% in 2005, up by 5.9 percentage points since 2000<sup>4</sup>.

- 11.4% of the persons aged 15-64 were part-timers. 17.9% of the women of the same age group worked part-time, with large disparities by country, from 2.0% in Slovakia to 49.8% in the Netherlands.

- 164.8 million workers were employees. Their average usual working hours were 40.4 hours a week for those working full-time and 20.0 hours for those working part-time. 14.5% of them hold a contract with limited duration (19.5% in Portugal, 25.7% in Poland, 33.3% in Spain).

→ 19.5 million people were unemployed (of which 48.9% were women and 8.0% were persons aged 55-64).

- 8.7 million were in long term unemployment (one year and more).

- 8.4% of the young people aged 15-24 years were unemployed (more than 10% in Poland, Slovakia, Finland and Sweden).

→ 163.3 million people aged 15 years or more were economically inactive.

<sup>1</sup> The Lisbon European Council (March 2000) set long-term targets for employment rates for 2010: 70% for the population aged 15-64 and 60% for women of the same age group. The 2001 Stockholm European Council set mid-term targets to be reached in 2005: 67% for the total employment rate and 57% for the female employment rate.

<sup>2</sup> Date of the launching of the European Employment Strategy by the extraordinary Luxembourg European Council on Employment.

<sup>3</sup> Missing quarters are estimated by Eurostat for the production of the annual averages.

<sup>4</sup> The Stockholm European Council of 2001 set also a long-term target for the employment rate of persons aged 55-64: 50% to be reached in 2010.

## Work status of persons aged 15 years or more, EU-25, 2005 (1)

Note: (1) Due to non-response, certain sub-totals may not exactly sum up to the corresponding aggregate. Persons aged 75 or more are considered as retired.

Source: Eurostat, EU-LFS

- Notes:
- Small sample size may affect the reliability of some of the data (shown in brackets). The symbol ":" is used when data is either not available or extremely unreliable.
  - The breakdown of employed persons by economic activity is based on the classification NACE Rev 1.1 (sections A and B for agriculture, C to F for industry, G to K for market services, and L to Q for non market services).
  - BG: due to the very high proportion of persons active in agriculture in addition to another main occupation, the Labour Force Survey does not provide a precise estimate of total employment in this sector.

Notes: - Small sample size may affect the reliability of some of the data (shown in brackets). The symbol ":" is used when data is either not available or extremely unreliable.

- Long-term unemployed persons are persons who have been unemployed for one year or more, i.e. unemployed persons who have searched for employment for one year or longer of left last job one year or more ago, whichever period is shorter. The long-term unemployment rate represents long-term unemployed persons as a percentage of the active population.

- The % of unemployed for 1 year or + represents long-term unemployed persons as a percentage of the unemployed persons.

- Youth unemployment ratio represents unemployed aged 15-24 years as a percentage of the total population of this age group.

**Table 8 - Education, Spring 2005**

(%)	Participation in education or training (25-64 years)			Population with at least level ISCED 3 (25-64 years)			Early school leavers (18-24 years)			Population with at least level ISCED 3 (20-24 years)

- Notes:
- Participation in education and training refers to persons who answered that they had received education or training in the four weeks preceding the survey. Students who were on holiday in this period are not included.
  - Early school leavers includes all the persons aged 18 to 24 who are not in education or training and with at most lower secondary education (ISCED 0-2).
  - CY: students usually living in the country but studying abroad are not covered by the survey.

## ➤ ESSENTIAL INFORMATION – METHODOLOGICAL NOTES

The 2005 European Union Labour Force Survey (EU LFS) was conducted in the 25 Member States of the European Union and 3 countries of the European Free Trade Association (EFTA) in accordance with Council Regulation (EEC) No. 577/98 of 9 March 1998. Three Candidate countries also participated in the 2005 survey.

The EU-LFS is a large household sample survey providing annual and quarterly results on labour participation of people aged 15 and over as well as on persons outside the labour force. Its sampling rates vary between 0.3% and 3.3%. Respondents answer for a specific week (called "reference week") of the quarter. The reference week starts on Monday and ends on Sunday. In most of the countries the sample is spread uniformly over all weeks. The reference year is the calendar year except in Ireland and the United Kingdom (December 2004 to November 2005).

The results on tables 1 to 7 consist of an annual average of the 2005 quarterly surveys, the table 8 is derived from the surveys conducted in Spring (quarter 1 or 2 according to the country or indicator).

The Swedish data are derived from a revised questionnaire. In particular students looking for a job and available to work are now considered as unemployed according to EU definitions. In 2005 the Spanish questionnaire was revised to improve the coverage of small duration jobs and of methods used to find work. The impact of these changes in Spain was estimated at +0.4 percentage point on employment rate (16-64 years old), +0.2 p.p. on activity rate and -0.4 p.p. on unemployment rate.

### Basic concepts and definitions

All these definitions apply to persons aged 15 years and over, living in private households. The concepts and definitions used in the survey follow the guidelines of the International Labour Organisation. Persons carrying out obligatory military service are not included.

Employed persons were those aged 15 years and over (16 years and over in ES and UK, 15 to 74 years in DK, EE, HU, LV, SE, FI and NO, 16-74 in IS) who during the reference week did any work for pay, profit or family gain for at least one hour, or were not at work but had a job or business from which they were temporarily absent because of, e.g., illness, holidays, industrial dispute and education or training. Unemployed persons comprise persons aged 15 to 74 (16 to 74 in ES, UK and IS) who were without work during the reference week, were currently available for work and were either actively seeking work or who found a job to start within the next three months.

Long-term unemployed persons are persons who have been unemployed for one year or more, i.e. unemployed persons who have searched for employment for one year or longer or left last job one year or more ago, whichever period is shorter.

The active population (labour force) is defined as the sum of employed and unemployed persons. Inactive persons are those who are neither classified as employed nor as unemployed.

Employees are defined as persons who work for a public or private employer and who receive compensation in the form of wages, salaries, payment by results or payment in kind; non-conscript members of the armed forces are also included.

Employees with temporary contracts are those who declare themselves as having a fixed term employment contract or a job which will terminate if certain objective criteria are met, such as completion of an assignment or return of the employee who was temporarily replaced.

The number of usual hours worked per week corresponds to the number of hours the person normally works including extra hours, either paid or unpaid, but excludes the travel time between the home and the place of work as well as the main meal breaks. The full-time/part-time distinction is declared by the respondent except in NL, IS and NO where part-time is determined if the usual hours are fewer than 35 hours and full-time if the usual hours are 35 hours or more, and in SE where this criterion is applied to the self-employed.

Employment rates represent employed persons as a percentage of the same age population. Part time employment rates represent persons employed part time as a percentage of the same age population.

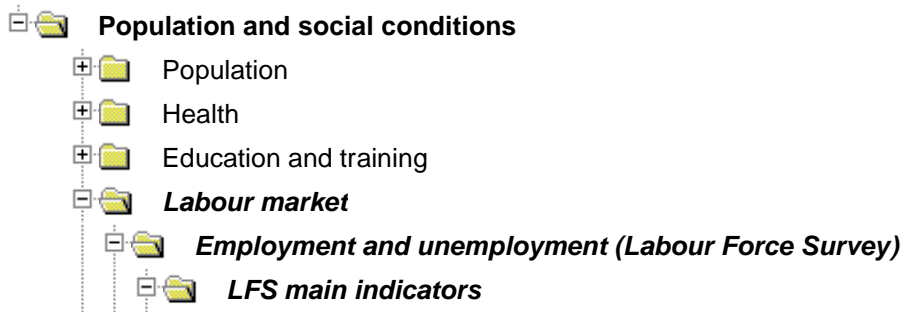

Unemployment rates represent unemployed persons as a percentage of the active population. Long-term unemployment rate represents long-term unemployed persons as a percentage of the active population. % of unemployed 1 year or + represents long-term unemployed persons as a percentage of unemployed persons. The youth unemployment ratio represents unemployed aged 15-24 years as a percentage of the total population of this age group.

All rates and ratios are calculated excluding non responses.

Country codes applied in this publication: BE (Belgium), CZ (Czech Republic), DK (Denmark), DE (Germany), EE (Estonia), EL (Greece), ES (Spain), FR (Metropolitan France, excluding the 'Départements d'Outre-Mer', i.e. Guadeloupe, Martinique, Guyane and Réunion), IE (Ireland), IT (Italy), CY (Republic of Cyprus), LV (Latvia), LT (Lithuania), LU (Luxembourg), HU (Hungary), MT (Malta), NL (Netherlands), AT (Austria), PL (Poland), PT (Portugal), SI (Slovenia), SK (Slovakia), FI (Finland), SE (Sweden), UK (United Kingdom), EU-25 (European Union), EU-15 (former European Union of 15 Member States), Euro-area (EU-15 less DK, SE and UK), BG (Bulgaria), HR (Croatia), RO (Romania), IS (Iceland), NO (Norway), EEA (European Economic Area: includes all EU-25 countries, Iceland and Norway, excludes Liechtenstein), CH (Switzerland), EFTA (European Free Trade Association: includes Iceland, Norway and Switzerland, excludes Liechtenstein).

### European Statistical Data Support:

Eurostat set up with the members of the 'European statistical system' a network of support centres, which will exist in nearly all Member States as well as in some EFTA countries.

Their mission is to provide help and guidance to Internet users of European statistical data.

Contact details for this support network can be found on our Internet site: <http://epp.eurostat.ec.europa.eu/>
