Statistics on Credit Institutions

1999 Balance sheet total represented 258 % of EU-15 GDP

Petra Sneijers

8 330 credit institutions in 1999 in the EU

- There were 8 330 credit institutions in 1999 in the EU (excl. Ireland and 1998 data for Finland) - down 5.4 % compared to 1998 (excl. Ireland and Finland) - of which 48.7 % were co-operative enterprises.
- The EU (excl. Ireland and the Netherlands and 1998 data for Finland) counted 31 credit institutions with a balance sheet total over euro 99 billion.
- On average, there were 25 local units per enterprise in 1999 EU-15 (excl. Ireland and 1998 data for Finland). The number of local units for 1 000 000 inhabitants ranged from 233 in Greece to 1 000 in Spain.

1.8 % of the EU-15 total employment

- In 1999, the banking sector in the EU (excl. Ireland and data 1998 for Finland) employed 2 754 425 persons, which represented around 1.8 % of the total employment. Luxembourg recorded the highest proportion of persons employed in this sector (12 %).
- On average, a credit institution employed 331 persons, while a local unit had a staff of around 14 persons.

Balance sheet of more than euro 20 395 billion in 1999

- The balance sheet total of credit institutions in 1999 in the EU (excl. Ireland and 1998 data for Finland) amounted to euro 20 395 billion, which represented 258 % of EU-15 GDP.

Net interest income 2.3 times higher than Net commission income

- Net interest income in the EU (excl. Ireland and 1998 data for Finland) represented 1.18 % of the balance sheet total ranging from 0.52 % in Luxembourg to 2.28 % in Greece, while Net commission income on Balance sheet total ratio was of 0.51 % going from 0.27 % in Belgium to 1.37 % in Italy. The EU-15 net commission income increased by around 20 % between 1998 and 1999.

More statistics on credit institutions will be found in the comprehensive publication entitled '*Special Feature on Banking, Edition 2001*' which will be released in September 2001. This publication will review the situation of the European banking sector through sets of time series – going from 1992 to 1999 - covering topics as demography and structure, performance and competitiveness, internationalisation and employment. Detailed presentation of profit and loss account and of balance sheet data, and methodological notes will be included as well.

► ESSENTIAL INFORMATION – METHODOLOGICAL NOTES

1. Eurostat annual collection of statistics on credit institutions

Statistics are collected on a harmonised basis from Central Banks, Financial Supervisory Authorities and National Statistical Institutes in the frame of the European Parliament and Council Regulation amending Regulation No 58/97 concerning structural business statistics (Draft Annex 6 of the SBS Regulation). Data, which are delivered according to either the home or the host country approach, cover credit institutions classified under NACE Rev. 1 class 65.12 (Other monetary intermediation) but also under class 65.22 (Other credit granting). "Other monetary intermediation" includes monetary intermediation services provided by credit granting and deposit taking institutions other than central banks, while "Other credit granting" covers all kinds of credit granting services provided by financial intermediaries other than those offered by credit granting and deposit taking institutions.

2. Concepts and definitions

Population on 1st January: the inhabitants of a given area on 1st January of the year in question (or, in some cases, on 31st December of the previous year). The population is based on data from the most recent census adjusted by the components of population change produced since the last census, or based on population registers. (Eurostat/Demography/Population)

Total employment: total number of persons employed aged of 15 years and over, in all NACE branches (A-Q). (Eurostat/Labour Force Survey/Employment)

Gross Domestic Product at market prices: GDP at market prices is the final result of the production activity of resident producer units (ESA 1995). (Eurostat/National Accounts – Aggregates – Annual Data/GDP/Current Prices)

3. Symbols

The sign ‘..’ stands for not available, while the sign ‘-’ means not applicable.

4. Growth rates and ratios for EU-15, EUR-11 and EEA have been calculated based only on countries that have provided the data needed for calculations.

Structural Data: 8 330 credit institutions in 1999 EU-15

1) For available data only.

2) Regarding the number of enterprises, it covers the data at the end of year. 93 banks were active in 1999.

3) The number of public-law enterprises includes only savings banks.

4) The number of branches of non-EEA enterprises also includes the branches of EEA enterprises.

5) 1998 data. Growth (%) 97-98.

6) The number of licensed banks includes the branches of foreign banks in Sweden. The number of public-law enterprises includes only savings banks.

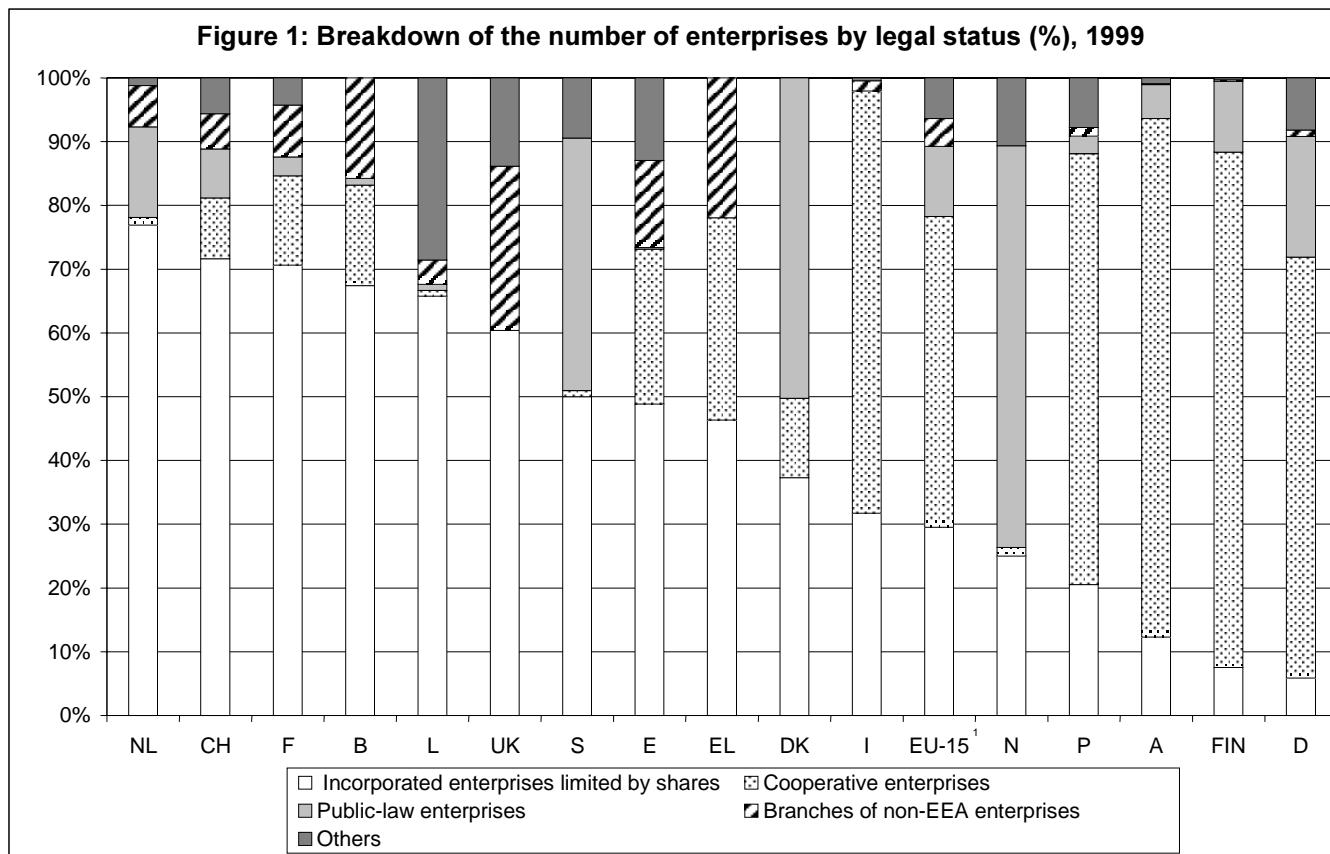

7) The number of incorporated enterprises limited by shares includes the UK banks and EEA branches in the UK.

8) The number of incorporated enterprises limited by shares includes the Postal bank. The number of public-law enterprises classified under Nace Rev.1 class 65.12 includes only savings banks. The number of public-law enterprises classified under Nace Rev.1 class 65.22 includes only State lending institutions. The number of enterprises with others legal status includes foreign banks in Norway.

9) The number of branches of non-EEA enterprises also includes 16 EEA branches.

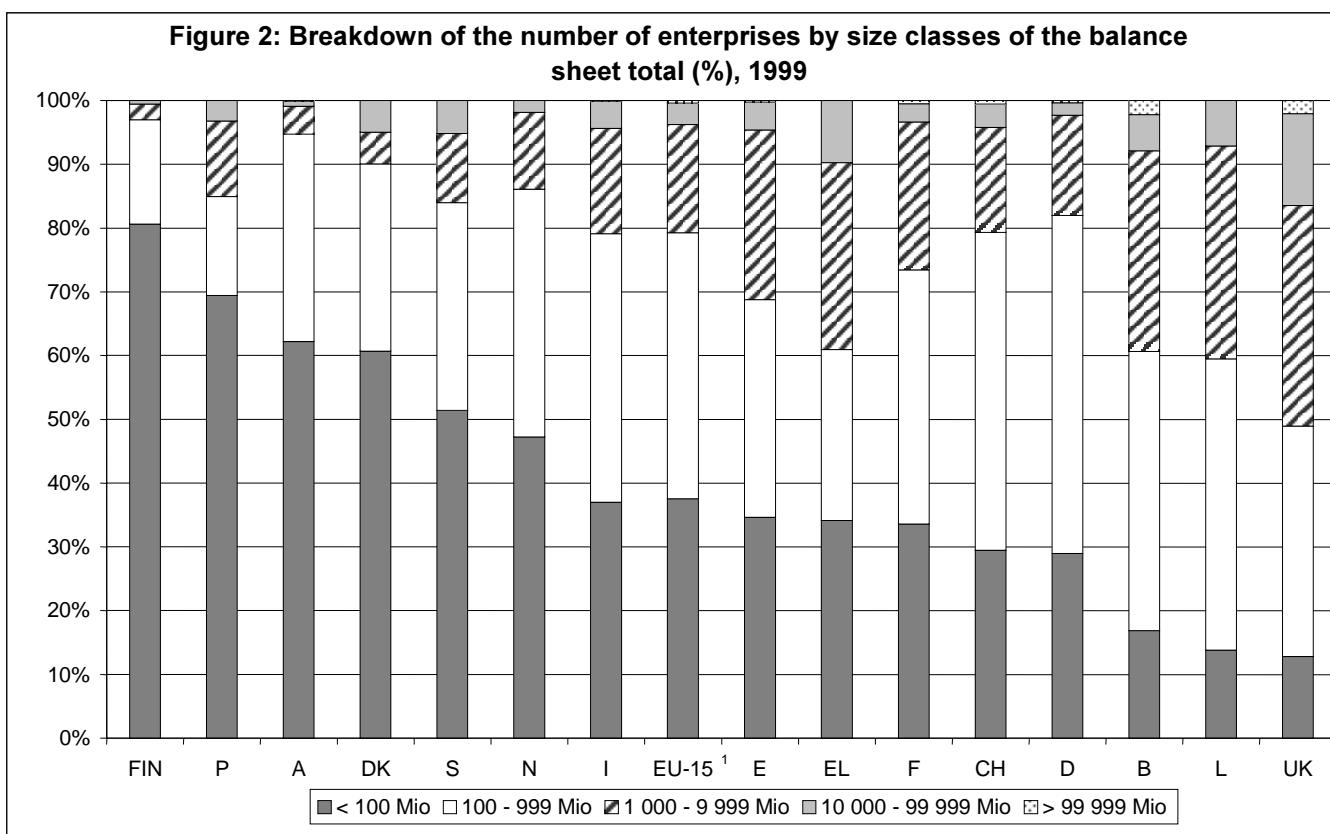

10) Only for countries for which 1998 and 1999 data are available.
