Cows' milk collection
by dairies in EU 15
April 2004

Warning: These figures concern the collection of cows' milk by dairies and creameries from farms and not the production of cows' milk on farms.

Note: As from 1 May 2004, the new Member States apply the Community legislation in its totality ('acquis communautaire').

Monthly situation

The new Member States are taken into account at the first month of the new milk year.

For the new partners of the Union, Eurostat will disseminate initially the monthly data on milk collection and the changes over the previous month. During the milk year it will be possible to analyze the situation, taking into account the dairy quotas assigned to each new partner.

Traditionally, weather conditions in April give rise to growth of grass, producing an increase of milk collection compared with March.

The general trend in EU-15 shows a drop in comparison with April 2003.
