# The Collection of Cows' milk in June 2005 in the EU-25

Warning: The data presented below concern the "collection" of cows' milk by dairies from agricultural holdings and not the "production" of cows' milk on holdings.

### Monthly situation

The collection of cows' milk in June 2005, in corrected data, decreased for the EU-15 (-4.0%) and the EU-25 (-2.8%) relative to May 2005. This decrease in collection, which is usual for June, was slightly different in previous years (2004, -3.7%; 2003; -1.4%).

The first effects of the heat wave at the end of June and the resulting shortage of water have not yet been seen in the collection data for the EU.

For the 25 Member States of the EU, 18 show a negative rate of change. Decreases more marked than 2.5% were observed for Belgium (-4.0%), Germany (-2.5%), Greece (-8.0%), France (-9.3%), Italy (-2.9%), Luxembourg (-6.4%), Austria (-3.0%), Sweden (-3.5%) and the United Kingdom (-4.2%). In contrast, an increase in collection of more than 2.5% was observed in Estonia (+6.3%), Latvia (+15.1%), Lithuania (+28.9%) and Poland (+5.3%).
