\* 'Household consumers' refers to consumer band D2 (annual consumption between 20 and 200 GJ) and the prices include all taxes.

## Comments

---

Price data for the Netherlands, Denmark and Slovenia are provisional.

## Methodology

---

### ***A new methodology for the collection of gas prices***

*The legal basis for the collection of industrial gas and electricity prices is defined by Council Directive 90/377/EEC. The collection of prices for household consumers is done on a voluntary agreement with the Member States.*

*Due to the liberalisation of the gas market, the methodology that defines the collection of the gas prices became outdated.*

*In June 2007, the Commission adopted a proposal from Directorate-General Transport and Energy and Eurostat to change the methodology for these price collections.*

*The main changes that were introduced for the collection of price information for the second semester of 2007 include:*

- *Prices are to be reported as national figures*
- *Prices are to be reported as an average of the last 6 months.*
- *Typical standard consumers are replaced by consumption bands*
