

# Survey of the EU pig population in December 2003 and production forecasts for 2004

*Linda Harley*

The pig population of the European Union stood at 121.5 million in December 2003, which was 0.6% lower than the previous year. Pig production in 2003 was 204.7 million animals, which represents an increase of 1.2% compared with 2002. According to the market forecasts presented by the Member States, pig production will be slightly lower in 2004 than in 2003 (-1.0%), being estimated at 202.5 million animals.

## EU pig population continues to decline

After falling by 0.4% between 2002 and 2001, the total pig population in the EU15 continues to fall, and a drop of 0.6% between 2003 and 2002 is estimated, leaving the EU's pig population at 121.5 million. Among Member States, the largest decline was recorded in the United Kingdom, with a fall of 9.7%, while the largest increase was seen in Spain (+2.0%). In the 10 new Member States, all the changes are downwards, and range from -8.4% in Hungary to -0.3% in Lithuania.

## Decrease in pig production

Pig production in the EU has been showing a slight upward trend since the start of 2002. This trend is not expected to continue into 2004, and a fall of 1% is expected. The Member States with the largest increases are Finland (+3.0%) and Germany (+1.1%) while Ireland (-5.9%) and the Netherlands (-4.4%) are forecasting the largest decreases.
